Risks relating to our Business and our Company

1. We have received Show-Cause Notice from RBI and any adverse action taken could affect our business and operations.

RBI issued a Show-Cause Notice dated March 16, 2018 ("SCN") under Section 45-IA(6) and Section 58(B) of the RBI Act, against our Company, in relation to alleged violations and non-compliance in the functioning of our Company. In the SCN, RBI has alleged that our Company failed to communicate the name, designation and address of the Principal Officer to the Financial Intelligence Unit-India ("FIU-IND") as directed by RBI by its various directions including Master Circular - Know Your Customer Guidelines DNBR (PD) CC No. 051/03.10.19/2015-16 dated July 1, 2015 and the Know Your Customer (Directions), 2016 ("KYC Directions"). Further, RBI alleges that it had issued several reminders, namely, letter No. DNBS (H) CMS/1713/04.08.025/2016-17 dated May 10, 2017 and email dated February 28, 2018. Furthermore, RBI also alleges that our Company has been included by the FIU-IND in its list of "High Risk Financial Institutions" for non-compliance with the provisions of Prevention of Money Laundering Act, 2002 and Prevention of Money Laundering (Maintenance of Records) Rules, 2005 ("PML Rules") and the directions and guidelines issued by RBI under Rule 9 (14) of the PML Rules. In the SCN, the RBI asked our Company to show cause on or before March 28, 2018 as to why the Certificate of Registration issued to our Company should not be cancelled under Section 45-IA(6) of the RBI Act and penal action should not be initiated against our Company for the offences punishable under Section 58 B of the RBI Act.

Our Company vide its letter dated March 23, 2018 ("Reply") with its reference to DNBS (H) CMS/1297/00.00.056/2016-17 dated March 16, 2018, responded to the SCN and submitted that our Company has applied for reporting entity registration with FIU-IND on February 26, 2018 and received the FIUREID on March 22, 2018. Further, our Company has received a certificate for registration for FIU-IND. There is no further communication in this regard.

2. Our Company, our Promoter and Directors and our Group companies have been subject to search and seizure operations conducted by the Indian income tax authorities.

Search and seizure proceedings were initiated by the Income Tax Department under Section 132 of the Income-Tax Act, 1961 (the "IT Search and Seizure Proceedings") on October 5, 2015 in the business premises of our Company and our Companies in our group namely KMLM Chits India Limited and KLM Fincorp Limited at Kothamangalam, Thirupunithura, Piravom and Kaloor. Simultaneously, search was also conducted in the residential premises of Mr. Shibu Theckumpurath Varghese, Director of the Company and Mr. Josekutty Xavier, Director of the Company. Further, a survey under section 133A of the I.T. Act was conducted in the business premises of our Company at Kolenchery, Aluva, Thodupuzha, Pala, Athani, Thirussur, Muvattupuzha, Perumbavoor and Pallithazham. During the search, certain documents and items were seized by the department

and sworn statements were recorded from Mr. Shibu Theckumpurath Varghese, Mr. Josekutty Xavier, and other employees of our Company, KMLM Chits India Limited and KLM Fincorp Limited. It was alleged that our Company has generated undisclosed income and utilized the same over the period. Pursuant to the IT Search and Seizure Proceedings, our Company received notices on November 30, 2017 under section 148 of the IT Act issued by the Deputy Commissioner of Income Tax, Centre Circle, Kochi, stating that income tax returns should be filed in 30 days for assessment of income. In response to these notices received above, our Company, our Group Companies, KMLM Chits India Limited and KLM Fincorp Limited and Mr. Shibu Theckumpurath Varghese, Director of the Company and Mr. Josekutty Xavier, Director of the Company (Collectively referred as “Applicants”) have filed income tax returns and subsequently approached Income tax Settlement Commission, Chennai Bench. Further, the Settlement Commission allowed the settlement applications of Applicants and presently the matter is pending before the Commissioner of Income Tax, Ernakulum. For details, please see section entitled “*Outstanding Litigation*” on page 167.

3. *Our financial performance is particularly vulnerable to interest rate volatility. If we are unable to manage interest rate risk in the future it could have an adverse effect on our net interest margin, thereby adversely affecting business and financial condition of our company.*

Our results of operations are substantially dependent upon the level of our Net Interest Margins. Interest income from our financing activities is the largest component of our total income, and constituted 95.51%, 97.23%, and 99.81% of our total income in Fiscal 2019, Fiscal 2018 and Fiscal 2017, respectively. As of March 31, 2019, March 31, 2018 and March 31, 2017, our loan books were ₹ 37,383.27 lakhs, ₹ 19,423.29 lakhs and 9,135.68 lakhs respectively. We borrow and lend funds on both fixed and floating rates. Volatility in interest rates can materially and adversely affect our financial performance. In a rising interest rate environment, if the yield on our interest-earning assets does not increase simultaneously with or to the same extent as our cost of funds, or, in a declining interest rate environment, if our cost of funds does not decline simultaneously or to the same extent as the yield on our interest-earning assets, our net interest income and net interest margin would be adversely impacted.

Accordingly, our operations are susceptible to fluctuations in interest rates. Interest rates are highly sensitive and fluctuations thereof are dependent upon many factors which are beyond our control, including the monetary policies of the RBI, de-regulation of the financial services sector in India, domestic and international economic and political conditions, inflation and other factors. Rise in inflation, and consequent changes in bank rates, repo rates and reverse repo rates by the RBI have led to an increase in interest rates on loans provided by banks and financial institutions, and market interest rates in India have been volatile in recent periods.

We do not hedge our exposure to interest rate changes. We cannot assure you that we can adequately manage our interest rate risk in the future. Further, changes in interest rates could affect the interest rates charged on interest earning assets and the interest rates paid on interest bearing liabilities in different ways. Thus, our results of operations could be affected by changes in interest rates and the timing of any re-pricing of our liabilities compared with the re-pricing of our assets.

4. *Our business requires substantial capital, and any disruption in funding sources would have a material adverse effect on our liquidity and financial condition.*

As an NBFC, our liquidity and on-going profitability are, in large part, dependent upon our timely access to, and the costs associated with, raising capital. Our funding requirements historically have been met from issuance of redeemable non-convertible debentures, the issue of subordinated debts and equity shares. Thus, our business depends and will continue to depend on our ability to access diversified funding sources. Our ability to raise funds on acceptable terms and at competitive rates continues to depend on various factors including our credit ratings, the regulatory environment and policy initiatives in India, investors' and/or lenders' perception of demand for debt and equity securities of NBFCs, and our current and future results of operations and financial condition. While our borrowing costs have been competitive in the past, if we are unable to access funds at an effective cost that is comparable to or lower than our competitors, we may not be able to offer competitive interest rates for our loans. This may adversely impact our business, prospects, cash flow, results of operations and financial condition.

Restrictive or penal order may be passed against us by the RBI in future proceedings that could hamper our operations or services, or a part thereof, or levy penalties in connection therewith, which may in turn adversely affect our operations and profitability. Changes in economic and financial conditions or continuing lack of liquidity in the market could make it difficult for us to access funds at competitive rates. Such conditions may

lead to a disruption in our primary funding sources at competitive costs and would have a material adverse effect on our liquidity and financial condition.

5. *High levels of customer defaults or delays in repayment of loans could adversely affect our business, financial condition and results of operations.*

Our business involves lending money and accordingly we are subject to customer default risks including default or delay in repayment of principal and/or interest on our loans. Customers may default on their obligations to us as a result of various factors including bankruptcy, lack of liquidity, lack of business and operational failure. If borrowers fail to repay loans in a timely manner or at all, our financial condition and results of operations will be adversely impacted.

In addition, our customer portfolio consists of individuals, small and medium enterprises and other group of the under banked community, who do not typically have easy access to financing from commercial banks or other organized lenders and often have limited credit history. Such borrowers generally are less financially resilient than larger corporate borrowers, and, as a result, they can be more adversely affected by declining economic conditions. In addition, we may not receive updated information regarding any change in the financial condition of our customers or may receive inaccurate or incomplete information as a result of any fraudulent misrepresentation on the part of our customers. Furthermore, unlike several developed economies, a nationwide credit bureau has only recently become operational in India, so there is less financial information available about the creditworthiness of our customers. It is therefore difficult to carry out precise credit risk analyses on our clients.

Our Company has in the past faced various instances of customers having defaulted and/or failed to repay dues in connection with loans and/or finance provided by our Company and has also initiated various legal proceedings in connection therewith. Further our Company also in certain cases restructured the terms and conditions of loans and/or finance provided by us, subject to applicable statutory and/or regulatory requirements. Further, another source of funding is repayment of loans by our customers. Any delays in repayment of loans by our customers in a timely manner or at all, could impact our funding plans.

Customer defaults could also adversely affect our levels of NPAs and provisioning of the same, which could in turn adversely affect our operations, cash flows and profitability. Our Gross NPAs have increased from ₹ 386.58 lakhs as at March 31, 2017 to ₹ 1,862.59 lakhs as at March 31, 2019 representing 4.98% of the total loans and advances and our Net NPAs have increased from ₹ 345.13 lakhs as at March 31, 2017 to ₹ 1,671.34 lakhs as at March 31, 2019 representing 4.47% of the total loans and advances. Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to continuously monitor the loan contracts, could adversely affect our credit portfolio which could have a material and adverse effect on our results of operations and financial condition.

6. *If we are unable to manage the level of NPAs in our Loan Assets, our financial position and results of operations may suffer.*

Our Gross NPAs have increased from ₹ 386.58 lakhs as at March 31, 2017 to ₹ 1,862.59 lakhs as at March 31, 2019 and our Net NPAs have increased from ₹ 345.13 lakhs to as at March 31, 2017 to ₹ 1,671.34 lakhs as at March 31, 2019. Our Gross NPAs as a percentage of total Loan Assets were 4.98%, 4.40%, and 4.23% as of March 31, 2019, March 31, 2018, and March 31, 2017 respectively, while our Net NPAs as a percentage of Net Loan Assets were 4.47%, 3.94%, and 3.78% as of March 31, 2019, March 31, 2018, and March 31, 2017, respectively. We cannot be ensure that we will be able to improve our collections and recoveries in relation to our NPAs or otherwise adequately control our level of NPAs in future. Moreover, as our loan portfolio matures, we may experience greater defaults in principal and/or interest repayments. Thus, if we are not able to control or reduce our level of NPAs, the overall quality of our loan portfolio may deteriorate and our results of operations may be adversely affected. Furthermore, our current provisions may not be adequate when compared to the loan portfolios of other financial institutions, currently as at March 31, 2019 our total provisioning for NPAs is ₹ 191.25 lakhs. Moreover, there also can be no assurance that there will be no further deterioration in our provisioning coverage as a percentage of Gross NPAs or otherwise, or that the percentage of NPAs that we will be able to recover will be similar to our past experience of recoveries of NPAs. In the event of any further deterioration in our NPA portfolio, there could be an even greater, adverse impact on our results of operations.

7. *We have limited operating history and evolving business make it difficult to evaluate our business and future operating results on the basis of our past performance, and our future results may not meet or exceed our past performance.*

The present management has acquired our Company in the Fiscal 2014 from the erstwhile management to start financial services. Subsequently, we started offering various products such as gold loan, personal loan and MSME loan. As per the strategy of the Company, we have recently forayed into microfinance lending. As a result of our limited operating history under the new management, there is limited historical operating information available to help prospective investors to evaluate our past performance as an entity. Given we have limited operating history in the loan finance business, we may face significant challenges in developing and institutionalizing our procedures and policies for that business. The loan finance business would require extensive monitoring, strict compliance with KYC requirements and prudent risk management. Our growth plans will place significant demands on our operational, credit, financial and other internal risk controls, making our management of asset quality increasingly important.

Our business in each sector and overall is growing and the results and amounts set forth in our financial statements may not provide a reliable indication of our future performance. Accordingly, you should evaluate our business and prospects in light of the risks, uncertainties and difficulties frequently encountered by both high growth companies and financial institutions that are in the early stages of development. Our failure to mitigate these risks and uncertainties successfully could materially adversely affect our business and operating results.

8. *We may not be able to recover, on a timely basis or at all, the full value of collateral or amounts which are sufficient to cover the outstanding amounts due under defaulted loans.*

Out of our Company's total gross loan portfolio of ₹ 37,383.27 lakhs as at March 31, 2019, 93.28% of the aggregate gross value of our loan book i.e. ₹ 34,871.97 lakhs is secured by collaterals and ₹ 2,511.30 lakhs representing 6.72% of the aggregate gross value of our loan book is unsecured loans. The value of collaterals is dependent on various factors inter-alia including (i) prevailing market conditions, (ii) the general economic and political conditions in India, (iii) the real estate markets in the areas in which we operate, and (iv) in context to Gold loan business, the value of Gold, being the security, is dependent on the International Gold prices.

The value of the security provided to us, may be subject to reduction in value on account of other extraneous reasons. Consequently, the realizable value of the security for the loans provided by us, when liquidated, may be lower than principal amount outstanding along with interest and other costs recoverable from such customers.

Although we believe that we generally maintain a sufficient margin in the collateral value, if we have to enforce such pledges and if at the time of such enforcement, due to adverse market conditions, the market value of the pledged securities have fallen to a level where we are unable to recover the monies lent by us, along with interest accrued thereon and associated costs, the results of our operations would be adversely affected. In case of any shortfall in margins in connection with the securities pledged as collaterals, we typically call upon the relevant customer to provide further collateral to make up for the deficit in such margins. Furthermore, enforcing our legal rights by litigating against defaulting customers is generally a slow and potentially expensive process in India. Accordingly, it may be difficult for us to recover amounts owed by defaulting customers in a timely manner or at all.

9. *We are subject to laws and regulations governing the banking and financial services industry in India and changes in laws and regulations governing us could adversely affect our business, results of operations and prospects.*

We are subject to the RBI's guidelines on financial regulation of NBFCs, including capital adequacy, exposure and other prudential norms. The RBI also regulates the credit flow by banks to NBFCs and provides guidelines to commercial banks with respect to their investment and credit exposure norms for lending to NBFCs. Additionally, we are required to make various filings with the RBI, the Registrar of Companies and other relevant authorities pursuant to the provisions of RBI guidelines, the Companies Act and other regulations.

The laws and regulations governing the non-banking financial services industry in India have become increasingly complex and cover a wide variety of issues such as interest rates, liquidity, securitization, investments, ethical issues, money laundering and privacy. In some cases, there are overlapping regulations and enforcement authorities. Moreover, these laws and regulations can be amended, supplemented or changed at any

time such that we may be required to restructure our activities and incur additional expenses to comply with such laws and regulations, which could materially and adversely affect our business and our financial performance. Compliance with many of the regulations applicable to our operations in India, including any restrictions on investments, lending and other activities currently being carried out by our Company, involves a number of risks, particularly in areas where applicable regulations may be subject to varying interpretations. If the interpretation of the regulators and authorities varies from our interpretation, we may be subject to penalties and our business could be adversely affected. We are also subject to changes in Indian laws, regulations and accounting principles and practices. There can be no assurance that the laws governing the Indian financial services sector will not change in the future or that such changes or the interpretation or enforcement of existing and future laws and rules by governmental and regulatory authorities will not adversely affect our business and future financial performance.

Further, as on March 31, 2019, our Company has asset size of ~ ₹ 425 crores and post completion of the Issue, the Company will have asset size of more than 500 crores. Subsequently, our Company will be considered as a systemically important ND-NBFC (“NBFC – ND – SI”) under Master Direction - Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016. NBFC – ND – SI operates in highly regulated business and are subject to the RBI’s guidelines on the regulation of the NBFCND- SI, which includes, among other things, matters related to capital adequacy, exposure, other prudential norms, deployment of assets, requirement of net owned funds, borrowing limits, provisioning and credit ratings and various other laws and regulations and regulatory investigations, which may have a material adverse effect on our business, financial condition or results of operation. For indicative list of balance sheet disclosure for NBFC – ND – SI and other compliances, please refer to Master Direction - Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016.

10. Our loan book comprises of unsecured loans forming a part of our Microfinance loan. Our inability to recover the amounts due from customers in connection with such loans in a timely manner or at all and/or to comply with applicable statutory/regulatory requirements in connection with such loans could adversely affect our operations and profitability.

Our loan book comprises of unsecured loans forming a part of our Microfinance loans. Since such loans are unsecured, in case of customer defaults in connection with such loans, our ability to realise the amounts due to us for such loans would be restricted to initiating legal proceedings for recovery, as we will not have the benefit of enforcing any security interest related to such loans. There can be no guarantee as to the time that would be taken for the final disposal of such legal proceedings and/or our ability to obtain favourable decisions in connection therewith.

Because of the unsecured nature of our Microfinance loans, it is essential that our products are appropriately priced, taking into account a possible high rate of interest and all other relevant factors. In making a decision whether to extend credit to prospective customers, and the terms on which we are willing to provide credit, including the price, we rely heavily on our credit scoring models, and our credit experience gained through monitoring the performance of customers over time. Our credit scoring models are based on previous historical experience. If our credit scoring models are not redeveloped as required or if they do not perform up to target standards we may experience increasing defaults or higher customer acquisition costs.

As of March 31, 2019, our unsecured lending book was ₹ 2,511.30 lakhs constituting 6.72 % of our total loan book. Further, our corporate lending products generally do not have any definite end-use restrictions and our customer may utilise such loans for various purposes, which are often incapable of being monitored on a regular basis or at all.

Our inability to recover the amounts due from customers in connection with such loans in a timely manner or at all and/or to comply with applicable statutory/regulatory requirements in connection with such loans could adversely affect our operations and profitability.

11. Our business operations involve transactions with relatively high risk borrowers. Any default from our customers could adversely affect our business, results of operations and financial condition.

We offer a wide range of financial products and services that address the specific financing requirements of low and middle income individuals as well as micro, small, and medium enterprises. Similarly, our loans are principally focused on first time users with limited access to capital through formal banking channels. A

significant portion of our customer base is typically less economically stable than large corporates, and as a result, is usually adversely affected by declining economic conditions. Earning capacity of customers in these segments depends on various macro and micro economic factors that affect them from time to time. We have a greater risk of loan defaults and losses in the event there are adverse economic conditions which may have a negative effect on the ability of our borrowers to make timely payments of their loans.

A significant portion of our target customers typically have limited access to credit with limited to no prior credit history. As a result, we are more vulnerable to customer default risks including delay in repayment of principal or interest on our loans. Although we have our own customised due diligence and credit analysis procedures, there can be no assurance that we will be able to ensure a lower delinquency rate. Our profitability depends on our ability to evaluate the right income levels of our customers, assess the credit risks and to price our loans accordingly. Our customers may default on their obligations as a result of various factors including bankruptcy, insolvency, lack of liquidity and/or failure of the business or commercial venture in relation to which such borrowings were sanctioned. Certain product segments and micro-enterprise loans in particular, are mostly unsecured and are susceptible to higher levels of credit risks. Failure to maintain sufficient credit assessment policies, particularly for small and medium enterprise borrowers, could adversely affect our credit portfolio which could have a material and adverse effect on our results of operations and financial condition.

12. We face increasing competition in our business which may result in declining margins if we are unable to compete effectively.

We face competition in all our lines of business. Our primary competitors are other NBFCs, public sector banks, private sector banks, co-operative banks and foreign banks and the unorganized financiers who principally operate in the markets where we operate. Banks have access to low cost funds which enables them to enjoy higher margins and / or offer finance at lower rates. NBFCs do not have access to large quantities of low cost deposits, a factor which can render them less competitive. In addition, interest rate deregulation and other liberalization measures affecting the retail and small and medium enterprises finance sector, together with increased demand for capital by individuals as well as small and medium enterprises, have resulted in an increase in competition.

In our microfinance business, we face competition from other NBFCs, microfinance companies as well as both commercial and small finance banks. In addition, the RBI has set out guidelines applicable to microfinance institutions which restrict the number of microfinance institutions that can extend loans to the same borrower and also limit the maximum amount of loan that can be extended. The presence of microfinance institutions in India is not uniform and certain regions have a concentration of a large number of microfinance institutions while there are regions which have very few and even no microfinance institution presence. In any particular region, the level of competition depends on the number of microfinance institutions that operate in such area. In addition, our target customers also borrow from money lenders and non-institutional lenders which may lend at higher rates of interest.

All of these factors have resulted in us facing increased competition from other lenders in each of our lines of businesses, including commercial banks and other NBFCs. Our ability to compete effectively will depend, to some extent, on our ability to raise low-cost funding in the future. Furthermore, as a result of increased competition in the finance sector, finance products are becoming increasingly standardized and variable interest rate and payment terms and lower processing fees are becoming increasingly common in the finance sector in India. There can be no assurance that we will be able to react effectively to these or other market developments or compete effectively with new and existing players in the increasingly competitive finance industry. Increasing competition may have an adverse effect on our net interest margin, and, if we are unable to compete successfully, our market share may decline. If we are unable to compete effectively with other participants in the finance sector, our business, future financial performance and the trading price of the NCDs may be adversely affected.

13. We are exposed to operational risks, including employee negligence, petty theft, burglary and embezzlement and fraud by employees, customers or third parties, which could harm our results of operations and financial position.

We also do cash collections to recover our dues. Such cash transactions expose us to the risk of theft, burglary and misappropriation or unauthorized transactions by our employees and fraud by employees, customers or third parties. Our insurance policies, security systems and measures undertaken to detect and prevent these risks may not be sufficient to prevent or deter such activities in all cases, which may adversely affect our operations and

profitability. Further, we may be subject to regulatory or other proceedings in connection with any unauthorized transaction, fraud or misappropriation by our representatives and employees, which could adversely affect our goodwill.

14. If we are unable to manage our growth effectively, our business and reputation could be adversely affected.

Pursuant to our growth strategies we have recently forayed into lending businesses. Our loan book has grown by a compounded annual growth rate, or CAGR, of 102.29 % from ₹ 9,135.68 lakhs as of March 31, 2017 to ₹ 37,383.27 lakhs as of March 31, 2019. Our total income increased from ₹ 2,393.75 lakhs for financial year 2016 – 2017 to ₹ 6,835.61 lakhs for financial year 2018 – 2019 at a CAGR of 68.99%. Our net profit after tax increased from ₹ 212.98 lakhs for financial year 2016 – 2017 to ₹ 597.74 lakhs financial year 2018 – 2019, at a CAGR of 67.53%. There can be no assurance that we will be able to sustain our growth strategy successfully or that we will be able to expand further or diversify our product portfolio. If we grow our loan book too rapidly or fail to make proper assessments of credit risks associated with new borrowers, a higher percentage of our loans may become non-performing, which would have a negative impact on the quality of our assets and our financial condition.

Expanding our products or entering into new jurisdictions with new or existing products can be costly and require significant management time and attention. Additionally, as our operations grow in size, scope and complexity and our product offerings increase, we will need to enhance and upgrade our systems and infrastructure to offer an increasing number of enhanced solutions, features and functionality. The expansion of our systems and infrastructure will require us to commit substantial financial, operational and technical resources in advance of an increase in the volume of business, with no assurance that the volume of business will increase. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. Failure to train our employees properly may result in an increase in employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high-risk credit and impose significant costs on us.

15. We may experience difficulties in expanding our business into new regions and markets in India and introducing our complete range of products in each of our branches.

Historically, our distribution networks are concentrated in Kerala, Tamil Nadu and Karnataka. As part of our growth strategy, we continue to evaluate attractive growth opportunities to expand our business into new regions and markets in India. Factors such as competition, culture, regulatory regimes, business practices & customs and customer requirements in these new markets may differ from those in our current markets and our experience in our current markets may not be applicable to these new markets. In addition, as we enter new markets and geographical regions, we are likely to compete with other banks and financial institutions that already have a presence in those geographies and markets and are therefore more familiar with local regulations, business practices and customs and have stronger relationships with customers. Our business may be exposed to various additional challenges including obtaining necessary governmental approvals, identifying and collaborating with local business and partners with whom we may have no previous working relationship; successfully gauging market conditions in local markets with which we have no previous familiarity; attracting potential customers in a market in which we do not have significant experience or visibility; being susceptible to local taxation in additional geographical areas of India and adapting our marketing strategy and operations to different regions of India in which different languages are spoken. Our inability to expand our current operations may adversely affect our business prospects, financial conditions and results of operations.

16. Our business is based on the trust and confidence of our customers; any damage to that trust and confidence may materially and adversely affect our business, future financial performance and results of operations.

We are dedicated to earning and maintaining the trust and confidence of our customers and we believe that the good reputation created thereby and inherent in the “KLM” brand name is essential to our business. The reputation of our Company and/or the “KLM” brand could be adversely affected by any threatened and/or legal proceedings and/or any negative publicity or news articles in connection with our Company or the “KLM” brand. As such, any damage to our reputation, or that of the “KLM” brand name, could substantially impair our ability to maintain or grow our business. If we fail to maintain brand recognition with our target customers due to any issues with our product offerings, a deterioration in service quality, or otherwise, or if any premium in

value attributed to our business or to the brands under which our services are provided declines, market perception and customer acceptance of our brands may also decline. Any negative news affecting us might also affect our reputation and brand value.

17. System failures or inadequacy and security breaches in computer systems may adversely affect our business.

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control including a disruption of electrical or communications services. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. The information available to and received by our management through our existing MIS systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate our growing customer base and range of products.

Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Any failure to effectively maintain or improve or upgrade our management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

18. We have expanded into new lines of business and if we are unable to successfully run the new businesses profitably, our results of operations and financial condition may be affected.

As part of our growth strategy, we have also added additional products to our portfolio such as micro finance. We have limited experience in some of the recently launched products and business verticals which are partly targeted at a slightly different borrower segment. Our current strategy is to gain market share in strategically-selected target businesses, customer segments and geographies, however, there can be no assurance that we will be able to continue to successfully implement our strategy. If we grow our total credit exposure too rapidly or fail to make proper assessments of credit risks associated with new borrowers, a higher percentage of our loans may become non-performing, which would have an adverse effect on the quality of our assets and our financial condition.

Factors such as competition, customer requirements, regulatory regimes, business practices and customs in these new markets may differ from those in our existing markets, and our experience in our existing markets may not be applicable to these new markets. In addition, as we enter new markets and geographical regions, we are likely to compete with not only other banks and financial institutions but also the local unorganized or semi-organized private financiers, who are more familiar with local regulations, business practices and customs, and may have stronger relationships with target customers. Our inability to expand our current operations may adversely affect our business, financial condition and results of operations.

19. Any downgrade in our credit ratings could increase borrowing costs and adversely affect our access to capital and lending markets and could also affect our interest margins, business, results of operations and financial condition.

The cost and availability of debt capital depends in part on our short-term and long-term credit ratings. Credit ratings reflect the opinions of ratings agencies on our financial strength, operating performance, strategic position and ability to meet our obligations. Certain factors that influence our credit ratings may be outside of our control. Our long-term debt is presently rated “CARE BB+, Stable”, by CARE Ratings, which reflects the credit worthiness of our Company and also increases the confidence of the lender.

Any downgrade in our credit ratings could increase borrowing costs and adversely affect our access to capital and debt markets, which could in turn adversely affect our interest margins, our business and results of

operations and cash flows. In addition, any downgrade in our credit ratings could increase the probability that our lenders impose additional terms and conditions to any financing or refinancing arrangements we enter into in the future. Further, any downgrade in our credit ratings may also trigger an event of default or acceleration of certain of our future borrowings.

20. *Our measures to prevent money laundering may not be completely effective and we may be subject to scrutiny and penalties by the RBI for failure to implement effective measures. Moreover, various state government laws regulating money lending transactions could adversely affect our business, prospects, results of operations and financial condition.*

Our measures to prevent money laundering as required by the RBI, including KYC policies and the adoption of anti-money laundering policies and compliance procedures in all our branches may not be completely effective. There can be no assurance that attempts to launder money using us as a vehicle will not be made. Additionally, certain states in India have enacted laws to regulate money lending transactions, which may for instance establish a maximum rate of interest that can be charged. In the event, we are required to comply with the provisions of these state money lending laws, there may be severe civil and criminal penalties for non-compliance with the relevant money lending statutes. In the event that the government of any state in India requires us to comply with the provisions of their respective state money lending laws, or imposes any penalty against us for prior non-compliance, our business and results of operations could be adversely affected.

21. *We depend on the accuracy and completeness of information about customers and counterparties for certain key elements of our credit assessment and risk management process. Any misrepresentation, errors in or incompleteness of such information could adversely affect our business and financial performance.*

In deciding whether to extend credit or enter into other transactions with customers, for certain key elements of the credit assessment process, we rely on information furnished to us by or on behalf of customers (including in relation to their financial transactions and past credit history). We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the creditworthiness and encumbrances on collateral we may depend on the respective registrars and sub-registrars of assurances, credit information companies or credit bureaus, and on independent valuers in relation to the value of the collateral, and our reliance on any misleading information given, may affect our judgement of credit worthiness of potential borrowers, and the value of and title to the collateral, which may affect our business, prospects, results of operations and financial condition. We may receive inaccurate or incomplete information as a result of negligence or fraudulent misrepresentation. Our risk management measures may not be adequate to prevent or deter such activities in all cases, which may adversely affect our business prospects, financial condition and results of operations.

22. *Our ability to assess, monitor and manage risks inherent in our business differs from the standards of some of our counterparts in India and in some developed countries.*

We are exposed to a variety of risks, including liquidity risk, interest rate risk, credit risk, operational risk and legal risk. The effectiveness of our risk management is limited by the quality and timeliness of available data. Our strategies and risk management techniques may not be fully effective in mitigating our risks in all market environments or against all types of risk, including risks that are unidentified or unanticipated. Some methods of managing risks are based upon observed historical market behavior. As a result, these methods may not predict future risk exposures, which could be greater than the historical measures indicated. Other risk management methods depend upon an evaluation of information regarding markets, customers or other matters. This information may not in all cases be accurate, complete, current, or properly evaluated. Management of operational, legal or regulatory risk requires, among other things, policies and procedures to properly record and verify a number of transactions and events. Although we have established these policies and procedures, they may not be fully effective. Our future success will depend, in part, on our ability to respond to new technological advances and evolving the NBFC standards and retail finance sector standards and practices on a cost-effective and timely basis. The development and implementation of such technology entails significant technical and business risks. There can be no assurance that we will successfully implement new technologies or adapt our transaction-processing systems to customer requirements or evolving market standards.

23. *We are subjected to supervision and regulation by the RBI as a non - systemically important NBFC, and changes in RBI's regulations governing us could adversely affect our business.*

We are subject to the RBI's Master Direction Non – Banking financial Company, Non-Systemically Important Non- deposit taking Company (Reserve Bank) Directions, 2016 (“Master Directions – Non-Systemically NBFC”). The Master Directions – Non-Systemically NBFC further provides directions to all non-systemically important-NBFCs on classification of assets, requirements for provisioning and disclosures to be made in the balance sheet on provisions for bad and doubtful debt and provisions for depreciation in investments.

There can be no assurance that the RBI and/or the Government will not implement regulations or policies, including policies or regulations or legal interpretations of existing regulations, relating to or affecting on classification of assets, requirements for provisioning and disclosures to be made in the balance sheet on provisions for bad and doubtful debt and provisions for depreciation in investments, or otherwise take action, that could have an adverse effect on non-systemically important-NBFCs. In addition, there can be no assurance that any changes in the laws and regulations relative to the Indian financial services industry will not adversely impact our business.

24. Our success depends in large part upon our management team and key personnel and our ability to attract, train and retain such persons.

Our ability to sustain our rate of growth depends significantly upon our ability to manage key issues such as selecting and retaining key operations personnel, developing managerial experience to address emerging challenges and ensuring a high standard of client service. In order to be successful, we must attract, train, motivate and retain highly skilled employees, especially branch managers and product executives. If we cannot hire additional qualified personnel or retain them, our ability to expand our business will be impaired and our revenue could decline. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. Failure to train and motivate our employees properly may result in an increase in employee attrition rates, divert management resources and subject us to incurring additional human resource related expenditure. Hiring and retaining qualified and skilled managers are critical to our future, as our business model depends on our credit-appraisal and asset valuation mechanism, which are personnel-driven operations. Moreover, competition for experienced employees in the finance sector can be intense. Our inability to attract and retain talented professionals, or the resignation or loss of key operations personnel, may have an adverse impact on our business and future financial performance.

25. Our Company, Directors and Promoters are subject to certain legal proceedings and any adverse decision in such proceedings may have a material adverse effect on our business, financial condition and results of operations.

We, our Directors and Promoters are subject to certain legal proceedings including civil suits, consumer litigations, tax litigations etc. We incur substantial cost in defending these proceedings before a court of law. Moreover, we are unable to assure you that we or our Promoter and Directors shall be successful in any or all of these actions. In the event, we or our Promoter and Directors suffer any adverse order, our reputation may suffer and may have an adverse impact on our business and results of operations. We cannot assure that an adverse order by any statutory or governmental authority would not have a negative impact on our profit and financial condition. For further details of the legal proceedings that we are subject to, please refer to the chapter titled “Outstanding Litigations” on page 190.

26. We have had negative net cash flows from our operating, investing and financing activities in the recent fiscal years. Any negative cash flows in the future may adversely affect our results of operations and financial condition.

We have had negative net cash flows from our operating, investing and financing activities during our last five fiscal years, the details of which are summarised below:

	<i>(in ₹ lakhs)</i>				
Particulars	Fiscal 2019	Fiscal 2018	Fiscal 2017	Fiscal 2016	Fiscal 2015
Net cash generated from/ (used in) operating activities	(14,040.97)	(7,736.06)	(2,287.50)	(2,364.94)	(789.93)
Net cash generated from/ (used in) investing activities	(916.91)	(221.69)	(564.36)	(227.83)	(139.84)
Net cash generated	15,191.37	9,183.90	3,396.06	2,056.91	1,287.61

from/ (used in)
financing activities

Any negative cash flows in the future may adversely affect our results of operations and financial condition. For further details, please see the sections titled “*Financial Statements*” on page 116.

27. *We may not be able to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business.*

We require certain statutory and regulatory permits and approvals to operate our business, including a certificate of registration as an NBFC from the RBI, which requires us to comply with certain terms and conditions to continue our NBFC operations. The RBI conducts periodical inspection of our operations and records under the RBI Act. If we fail to comply with the RBI’s observations in such inspections reports or in the event that we are unable to comply with any or all of these terms and conditions, or seek waivers or extensions of time for complying with these terms and conditions, it is possible that the RBI may revoke this licence or may place stringent restrictions on our operations. This may result in the interruption of all or some of our NBFC operations and have a material adverse effect on our business, financial condition and results of operations. We also obtain licenses and approvals to operate our various lines of business and in the future, we will be required to maintain such permits and approvals and obtain new permits and approvals for any proposed expansion strategy or diversification into additional business lines or new financial products. We may not be able to obtain such approval in a timely manner or at all.

In addition, our various offices are required to be registered under the relevant shops and establishments laws of the states. The shops and establishment laws regulate various employment conditions, including working hours, holidays and leave and overtime compensation. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of these conditions, our certificate of registration may be suspended or cancelled and we shall not be able to carry on such activities. We may also incur substantial costs related to litigation if we are subject to significant regulatory action, which may adversely affect our business, future financial performance and results of operations.

28. *Our insurance coverage may not be sufficient or may not adequately protect us against any or all hazards, which may adversely affect our business, results of operations, financial condition and cash flows.*

We maintain insurance coverage for our operations in normal course. Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. We cannot, assure you that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

We cannot assure you that any claim under the insurance policies maintained by us will be honored fully, in part or on time, or that we have obtained sufficient insurance to cover all our losses. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, or at acceptable cost, or at all. For further details on our insurance arrangements, see “*Our Business – Insurance*” on page 86.

29. *We may be subject to regulations in respect of provisioning for non-performing assets. If such provisions are not sufficient to provide adequate cover for loan losses that may occur, this could have an adverse effect on our financial condition, liquidity and results of operations.*

RBI guidelines prescribe the provisioning required in respect of our outstanding loan portfolio. These provisioning requirements may require us to reserve lower amounts than the provisioning requirements applicable to financial institutions and banks in other countries. The provisioning requirements may also require the exercise of subjective judgments of management. The RBI vide the Master Directions provides for the regulatory framework governing NBFCs pertaining to provision for standard assets.

There are multiple factors that affect the level of NPAs in our Company. Various factors that are beyond our control, such as macro-economic factors (including a rise in unemployment, a sharp and sustained rise in

interest rates, developments in the Indian economy, movements in global commodity markets and exchange rates), regulatory hurdles and global competition as well as customer specific factors such as wilful default and mismanagement of a customer's operations, may result in increasing NPA levels and may have an adverse impact on the quality of our loan portfolio. If we are unable to effectively control our NPA levels in the future, we will be required to increase our provisions, which may adversely affect our profitability and financial condition. The RBI regulates certain aspects of the recovery of non-performing loans, such as the use of recovery agents. Any limitation on our ability to recover, control and reduce non-performing loans under the applicable regulatory regime or otherwise could affect our collections and ability to foreclose on existing NPAs. The level of our provisions may not be adequate to cover further increases in the amount of our nonperforming assets or a decrease in the value of the underlying gold collateral. If we are unable to control the level of our NPAs in the future, quality of our loan portfolio could deteriorate, our credit ratings could be downgraded and our cost of funds could increase, any of which could have a material adverse effect on our financial condition and results of operations.

30. *All of our offices and branches are located in leased premises and non-renewal of lease agreements or their renewal on terms unfavorable to us could adversely affect our operations.*

As of June 30, 2019, all of our offices (including our Registered Office and Corporate Office) and branches are located in leased premises. Further, as we expand our branch network in line with our growth strategy, we expect the number of leased branches to increase significantly as all of our new branches are expected to open on leased premises. If any of the owners of these premises do not renew the agreements under which we occupy the premises, or if they seek to renew such agreements on terms and conditions unfavorable to us, or if they terminate the agreement we may suffer a disruption in our operations or increased costs, or both, which may adversely affect our business and results of operations.

All or any of the leases may not be renewed on similar terms or at all, or we may be evicted from all or a number of these premises and be required to pay damages to the landlord. This may adversely impact our business and financial condition.

31. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

We have entered into various transactions with related parties, including for payment of salaries of key managerial personnel, interest paid and receipt of loans. While we believe that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, we cannot assure you that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties. It is likely that we may enter into related party transactions in the future. Although all related party transactions that we may enter into post-listing, will be subject to board or shareholder approval, as necessary under the Companies Act, 2013, as amended and the SEBI Listing Regulations, we cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favorable terms if such transactions had not been entered into with related parties. For details, see "*Related Party Transactions*" in the chapter titled "*Financial Statements*" on page 116.

32. *The new bankruptcy code in India may affect our rights to recover loans from borrowers.*

The Insolvency and Bankruptcy Code, 2016 ("**Bankruptcy Code**") was notified on August 5, 2016. The Bankruptcy Code offers a uniform and comprehensive insolvency legislation encompassing all companies, partnerships and individuals (other than financial firms). It allows creditors to assess the viability of a debtor as a business decision, and agree upon a plan for its revival or a speedy liquidation. The Bankruptcy Code creates a new institutional framework, consisting of a regulator, insolvency professionals, information utilities and adjudicatory mechanisms, which will facilitate a formal and time-bound insolvency resolution and liquidation process.

In case insolvency proceedings are initiated against a debtor to our Company, we may not have complete control over the recovery of amounts due to us. Under the Bankruptcy Code, upon invocation of an insolvency resolution process, a committee of creditors is constituted by the interim resolution professional, wherein each financial creditor is given a voting share proportionate to the debts owed to it. Bankruptcy Code provides a 180-day timeline which may be extended by 90 days when dealing with insolvency resolution applications. Subsequently, the insolvency resolution plan prepared by the insolvency professionals has to be approved by

66% of voting share of financial creditors, which requires sanction by the adjudicating authority and, if rejected, the adjudicating authority will pass an order for liquidation. Any resolution plan approved by committee of creditors is binding upon all creditors, even if they vote against it. In case a liquidation process is opted for, the Bankruptcy Code provides for a fixed order of priority in which proceeds from the sale of the debtor's assets are to be distributed. Before sale proceeds are distributed to a secured creditor, they are to be distributed for the costs of the insolvency resolution and liquidation processes, debts owed to workmen and other employees, and debts owed to unsecured credits. Further, under this process, dues owed to the Central and State Governments rank at par with those owed to secured creditors. Moreover, other secured creditors may decide to opt out of the process, in which case they are permitted to realise their security interests in priority.

Accordingly, if the provisions of the Bankruptcy Code are invoked against any of the borrowers of our Company, it may affect our Company's ability to recover our loans from the borrowers and enforcement of our Company's rights will be subject to the Bankruptcy Code.

33. The fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution.

We intend to use the net proceeds of the Issue, after meeting the expenditures of and related to the Issue, for the purpose of onward lending, repayment of interest and principal of existing borrowings and for general corporate purposes. For further details, see "*Objects of the Issue*" at page 63. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. The management will have significant flexibility in applying the proceeds received by us from the Issue. Further, as per the provisions of the SEBI Debt Regulations, we are not required to appoint a monitoring agency and therefore no monitoring agency has been appointed for the Issue.

34. Our results of operations could be adversely affected as a result of any disputes with our employees.

Our operations are personnel-driven, and we place a lot of emphasis on the effective training of our personnel in communication and service orientation skills. However, a failure to train and motivate our employees may lead to an increase in our employee attrition rates, erode the quality of customer service, divert management resources and impose significant costs on us which may have an adverse impact on our business and future financial performance.

We employ 520 full-time employees as of June 30, 2019, and lay significant emphasis on our employees' overall welfare. However, there can be no assurance that there will not be any future disruptions in our operations due to any disputes with our employees, or that such disputes will not adversely affect our business and results of operations. We depend on our branch-level employees for sourcing, disbursements and collections and customer liaison, and significant attrition at any of our branches could adversely impact our operations. Further, in the event of a labour dispute, protracted negotiations and strike action may impair our ability to carry on our day-to-day operations, which could materially and adversely affect our business, future financial performance and results of operations.

35. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and the NBFC and Loan industries contained in this Draft Prospectus.

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy as well as the Loan industry have been based on various publications and reports from agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials, particularly since there is limited publicly available information specific to the Loan industry. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics, the same have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "*Industry Overview*" beginning on page 66. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

36. Our Whole time Director, Mr. Shibu Theckumpurath Varghese, is a director of KMLM Financial Services Limited. RBI has previously issued a notice to KMLM Financial Services Limited for certain non-compliances of/ violating the provisions/ direction of RBI Act, 1934.

Our Company has appointed Mr. Shibu Theckumpurath Varghese as a Whole time Director with effect from July 27, 2016. Further RBI vide a letter dated June 9, 2017 sought certain clarification from our Company in relation to the said appointment of Mr. Shibu Theckumpurath Varghese as a Whole time Director. It was alleged that Mr. Shibu Theckumpurath Varghese is associated as a director with KMLM Financial Services Limited which conducts business of a non-banking financial company without obtaining a Certificate of Registration from RBI. Therefore, KMLM Financial Services Limited is violating the provisions/ direction of the RBI Act, 1934 and accordingly, the appointment of Mr. Shibu Theckumpurath Varghese in our Company was without undertaking a process of due diligence to determine the suitability of the person for appointment as a director on the board of the directors, based upon qualification, expertise, track record, integrity and other 'fit and proper' criteria as per the master direction dated September 1, 2016.

Further, our Company vide a letter dated June 26, 2017 has submitted its reply to the aforementioned letter and submitted that KMLM Financial Services Limited was incorporated on November 9, 2011 and has applied to RBI for obtaining certificate of registration to carry on NBFC business. In the application to RBI, KMLM Financial Services Limited informed that it has lent very few loans to meet the minimum net owned fund criteria of ₹ 2 crore. However, KMLM Financial Services Limited has not lent any fresh loans and stopped doing business since the Fiscal 2013 and recovered all subsisting loans during the current Fiscal 2018 with the money lying in the fixed deposit as on date. Therefore, KMLM Financial Services Limited has not been doing any finance business and is in compliance with the law and statutory requirements of RBI. Further, our Company has submitted a letter dated March 12, 2018 to RBI stating that the Company has done proper due diligence as per the Master Direction before appointing of Mr. Shibu Theckumpurath Varghese as a Whole time Director and sought the confirmation of RBI whether of Mr. Shibu Theckumpurath Varghese as a Whole time Director is under fit and proper criteria as per Master Direction. In the event of any adverse order from RBI in relation to the appointment of Mr. Shibu Theckumpurath Varghese in our Company, he will have to resign from the post of Whole Time Director.

37. The use of "KLM AXIVA" or similar trade names by third parties may result in loss of our business to such third parties and any potential negative publicity relating to such third parties may adversely affect our reputation, the goodwill of our brand and business prospects.

We believe that our trademarks and other proprietary rights have significant value and are important to identifying and differentiating our services from those of our competitors and creating and sustaining demand for our services. We have registered our trademark, "KLM AXIVA" and the logo "KLM AXIVA FINVEST"  with the Registrar of Trademarks under class 36. We believe that our trademarks have significant brand recognition, therefore, our trademarks are significant to our business and operations.

We cannot assure you that the steps taken by us to protect our intellectual property rights will be adequate to prevent infringement of such rights by others, including imitation and misappropriation of our brand. Additionally, we cannot assure you that obstacles will not arise as we expand our business and the geographic scope of our promotional and marketing activities. Third parties may assert intellectual property claims against us, particularly as we expand our business and enter newer industries. Our defense of any claim, regardless of its merit, could be expensive and time consuming and could divert management resources. Successful infringement claims against us could result in significant monetary liability or prevent us from selling some of our products. Any of these events could harm our business and cause our results of operations, liquidity and financial condition to suffer.

38. Third party statistical and financial data in this Draft Prospectus may be incomplete and unreliable.

This Draft Prospectus includes information that is derived from reports published by CRISIL Limited. For details, please see "Industry Overview" on page 66. No person connected with this Issue has independently verified the CRISIL Reports. Generally, industry reports and data disclaim the accuracy, adequacy or completeness of information provided in such reports, and further disclaims any responsibility for any errors or omissions in the information provided, or for the results obtained from the use of such industry information. Further, the CRISIL Reports are subject to many assumptions. We cannot assure you that the assumptions considered in the CRISIL Reports are correct or will not change and accordingly our position in the market may

differ from that presented in this Draft Prospectus. Further, the CRISIL Reports are not a recommendation to invest / disinvest in the Issue.

39. *There is no assurance that the NCDs issued pursuant to this Issue will be listed on BSE Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the NCD issued pursuant to this Issue will not be granted until after the NCDs have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issue of NCDs to be submitted. There could be a failure or delay in listing the NCDs in BSE.

40. *Our Company may raise further borrowings and charge its assets after receipt of necessary consents from its existing lenders. In such a scenario, the Debenture Holders holding NCDs will rank pari passu with other secured creditors and to that extent, may reduce the amounts recoverable by the Debenture Holders upon our Company's bankruptcy, winding up or liquidation*

Our Company may, subject to receipt of all necessary consents from its existing lenders and the Debenture Trustee to the Issue, raise further borrowings and charge its assets. Our Company is free to decide the nature of security that may be provided for future borrowings. In such a scenario, the Debenture Holders holding NCDs will rank pari passu with other creditors and to that extent, may reduce the amounts recoverable by the Debenture Holders upon our Company's bankruptcy, winding up or liquidation.

41. *Payments to be made on the NCDs are subordinated to certain taxes and other liabilities preferred by law. In the event of bankruptcy, liquidation or winding up, there may not be sufficient assets of our Company remaining, to pay amounts due on the NCDs.*

The NCDs will be subordinated to certain liabilities preferred by law such as the claims of the Government on account of taxes, and certain liabilities incurred in the ordinary course of our business. In particular, in the event of bankruptcy, liquidation or winding-up, our Company's assets will be available to pay obligations on the NCDs only after all of those liabilities that rank senior to the NCDs have been paid as per Section 327 of the Companies Act, 2013 or Section 53 of the Insolvency and Bankruptcy Code, 2016, as the case maybe. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining to pay amounts, due on the NCDs.

External Risk Factors

42. *Our business is affected by prevailing economic, political and other prevailing conditions in India and the markets we currently serve.*

Our Company is incorporated in India, and all of our assets and employees are located in India. As a result, we are dependent on prevailing economic conditions in India and our results of operations are affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our developments and expansions;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies, like application of GST;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- infectious disease outbreaks or other serious public health concerns;
- prevailing regional or global economic conditions, including in India's principal export markets; and
- other significant regulatory or economic developments in or affecting India or its financial services sectors.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition. Our performance and the

growth of our business depend on the performance of the Indian economy and the economies of the regional markets we currently serve. These economies could be adversely affected by various factors, such as political and regulatory changes including adverse changes in liberalization policies, social disturbances, religious or communal tensions, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. Any slowdown in these economies could adversely affect the ability of our customers to afford our services, which in turn would adversely impact our business and financial performance.

43. *Financial difficulties and other problems in certain financial institutions in India could cause our business to suffer and adversely affect our results of operations.*

We are exposed to the risks of the Indian financial system, which in turn may be affected by financial difficulties and other problems faced by certain Indian financial institutions. Certain Indian financial institutions have experienced difficulties during recent years. Some co-operative banks (which tend to operate in rural sector) have also faced serious financial and liquidity crises. There has been a trend towards consolidation with weaker banks, NBFCs and HFCs being merged with stronger entities. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions, banks and NBFCs. This in turn could adversely affect our business, our future financial performance, our shareholders' funds and the market price of our NCDs.

44. *Natural disasters and other disruptions could adversely affect the economy and could adversely affect our business, results of operations and financial condition.*

Our operations, including our branch network, may be damaged or disrupted as a result of natural disasters such as earthquakes, floods, heavy rainfall, epidemics, tsunamis and cyclones and other events such as protests, riots and labour unrest. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations. Damage or destruction that interrupts our provision of services could adversely affect our reputation, our relationships with our customers, our senior management team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our branch network. Any of the above factors may adversely affect our business, results of operation and financial condition. For instances, the state of Kerala had experienced torrential flooding which has resulted in extensive damage to the existing infrastructure in the state, including damage to the airports, roads, bridges, and housing. Since our Company has a strong retail franchise, particularly in Kerala including a large part of our business and branches, the flood in the state had affected the credit cost and business growth during that period.

45. *The NCD Holders may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the NCDs. Failure or delay to recover the expected value from a sale or disposition of the assets charged as security in connection with the NCDs could expose the holders to a potential loss.*

Our ability to pay interest accrued on the NCDs and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors inter-alia including our financial condition, profitability and the general economic conditions in India and in the global financial markets. We cannot assure you that we would be able to repay the principal amount outstanding from time to time on the NCDs and/or the interest accrued thereon in a timely manner or at all. Although our Company will create appropriate security in favour of the Debenture Trustee for the NCD Holders on the assets adequate to ensure 100.00% asset cover for the NCDs, which shall be free from any encumbrance, the realisable value of the assets charged as security, when liquidated, may be lower than the outstanding principal and/or interest accrued thereon in connection with the NCDs. A failure or delay to recover the expected value from a sale or disposition of the assets charged as security in connection with the NCDs could expose you to a potential loss.

46. *Instability of economic policies and the political situation in India could adversely affect the fortunes of the industry.*

There is no assurance that the liberalisation policies of the government will continue in the future. Protests against privatisation could slow down the pace of liberalisation and deregulation. The Government of India plays an important role by regulating the policies and regulations that govern the private sector. The current

economic policies of the government may change at a later date. The pace of economic liberalisation could change and specific laws and policies affecting the industry and other policies affecting investments in our Company's business could change as well. A significant change in India's economic liberalisation and deregulation policies could disrupt business and economic conditions in India and thereby affect our Company's business.

Unstable domestic as well as international political environment could impact the economic performance in the short term as well as the long term. The Government of India has pursued the economic liberalisation policies including relaxing restrictions on the private sector over the past several years. The present Government has also announced policies and taken initiatives that support continued economic liberalisation. The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. Our Company's business may be affected not only by changes in interest rates, changes in Government policy, taxation, social and civil unrest but also by other political, economic or other developments in or affecting India.

47. If we do not generate adequate profits, we may not be able to maintain an adequate DRR for the NCDs issued pursuant to this Draft Prospectus, which may have a bearing on the timely redemption of the NCDs by our Company.

Section 71 of the Companies Act, 2013, read with Rule 18 made under Chapter IV of the Companies Act, 2013, requires any company that intends to issue debentures must create a DRR for the purpose of redemption of debentures, in accordance with the following conditions: (a) the DRR shall be created out of the profits of the company available for payment of dividend, (b) the DRR shall be equivalent to at least 25% of the value of the outstanding debentures, raised through public issue of debentures in accordance with the SEBI Debt Regulations in case of NBFCs registered with the RBI. Accordingly, our Company is required to create a DRR of 25% of the value of the outstanding NCDs issued through the Issue. In addition, as per Rule 18 (7) (e) under Chapter IV of the Companies Act, 2013, the amounts credited to DRR shall not be utilised by our Company except for the redemption of the NCDs. Every company required to create or maintain a DRR shall before the 30th day of April of each year, deposit or invest, as the case may be, a sum which shall not be less than 15% of the amount of its debentures maturing during the year ending on the 31st day of March, following any one or more of the following methods: (a) in deposits with any scheduled bank, free from charge or lien (b) in unencumbered securities of the Central Government or of any State Government; (c) in unencumbered securities mentioned in clauses (a) to (d) and (ee) of Section 20 of the Indian Trusts Act, 1882; (d) in unencumbered bonds issued by any other company which is notified under clause (f) of Section 20 of the Indian Trusts Act, 1882. The amount deposited or invested, as the case may be, shall not be utilized for any purpose other than for the repayment of debentures maturing during the year referred to above, provided that the amount remaining deposited or invested, as the case may be, shall not at any time fall below 15.00% of the amount of debentures maturing during the 31st day of March of that year. This may have a bearing on the timely redemption of the NCDs by our Company.

48. Trading of the NCDs may be limited by temporary exchange closures, broker defaults, settlement delays, strikes by brokerage firm employees and disputes.

The Indian stock exchanges have experienced temporary exchange closures, broker defaults, settlement delays and strikes by brokerage firm employees. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

49. We are required to prepare our financial statements with effect from April 1, 2019 under the Ind AS. As Ind AS differs in various respects from Indian GAAP, our financial statements for fiscal 2020 may not be comparable to our historical financial statements

The MCA, on February 16, 2015 had notified that IND AS will be implemented in a phased manner starting from financial year 2016-17. Subsequently, the MCA vide a notification dated March 30, 2016, amended the Companies (Indian Accounting Standards) Rules, 2015 ("IND AS"), to require NBFCs such as our Company to comply with the Indian Accounting Standards, for accounting periods beginning on or after April 1, 2019. We have not determined with any degree of certainty the impact that such adoption will have on our financial reporting. Additionally, IND AS has fundamental differences with the existing accounting standards and

therefore, financial statements prepared under IND AS may differ substantially from financial statements prepared under the existing framework of accounting standards. There can be no assurance that our financial condition, results of operation, cash flows or changes in shareholders' equity will not appear materially different under IND AS, Indian GAAP or IFRS. Accordingly, our financial statements for the period commencing from April 1, 2019 will not be comparable to our historical financial statements.

50. Significant differences exist between Indian GAAP and other accounting principles, such as IFRS, with which investors may be more familiar. Further, our Company will be subject to a number of new accounting standards as part of its transition to IND (AS) that may significantly impact its financial statements in future reporting periods

Our Reformatted Financial Information of our Company included in this Draft Prospectus prepared in accordance with the Companies Act and the SEBI Debt Regulations read along with the SEBI circular CIR/IMD/DF/18/2013 dated October 29, 2013. The Reformatted Financial Information has been prepared from the Audited Financial Statements. The Audited Financial Statements of the Company have been prepared in accordance with Indian GAAP.

Indian GAAP differs in certain significant respects from IFRS and other accounting principles and standards. Our Company has not made any attempt to quantify the impact of IFRS on the financial data included in this Draft Prospectus, nor does our Company provide a reconciliation of its financial statements to those of IFRS. Indian GAAP differs from accounting principles with which the prospective investors may be familiar in other countries, including IFRS. Accordingly, the degree to which the Reformatted Financial Information included in this Draft Prospectus will provide meaningful information is entirely dependent on the investor's level of familiarity with Indian GAAP, Companies Act and SEBI Debt Regulations. Any reliance by persons not familiar with Indian GAAP, Companies Act and SEBI Debt Regulations on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

As there is not yet a significant body of established practice, such as interpretations of the new accounting standards, on which to draw in forming judgments regarding the new system's implementation and application, our Company has not determined with any degree of certainty the impact such adoption will have on its financial reporting. However, the IND (AS) accounting standards will change its methodology for estimating allowances for probable loan losses, amongst others. They may require our Company to value its NPAs by reference to their market value (if a ready market for such loans exists) or to calculate the present value of the expected future cash flows realisable from its loans, including the possible liquidation of collateral (discounted at the loan's effective interest rate) in estimating allowances for probable loan losses. This may result in our Company recognising higher allowances for probable loan losses in the future.

As a result, there can be no assurance that our Company's financial condition, results of operations, cash flows or changes in shareholders' equity will not appear materially worse under IND (AS) than under Indian GAAP. Our Company's management may also have to divert significant time and additional resources in order to implement IND (AS) on a timely and successful basis. Moreover, there is increasing competition for the small number of IND (AS) experienced accounting personnel available as more Indian companies (including NBFCs) begin to prepare IND (AS) financial statements. There can be no assurance that our Company's adoption of IND (AS) will not adversely affect its reported results of operations or financial condition in the future and any failure to successfully adopt IND (AS) may impact our Company's business, financial condition and results of operations in the future.

51. Changes in interest rate may affect the price of our NCD. Any increase in rate of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.

All securities where a fixed rate of interest is offered, such as our NCDs, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e. when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.

Gross domestic product (GDP): Review and outlook

GDP growth to grow at a faster pace over the next five years

From fiscal 2014 until fiscal 2019, the key drivers of real GDP growth were private consumption and investment. Private consumption growth was bolstered by low inflation, benign interest rates and revision in salaries of government employees as per Pay Commission recommendations. The other side of the coin i.e. investments saw a gradual pick-up in the last few years but most of it has been led by government spending either through its budgetary resources or by nudging public sector enterprises to take on capital expenditure. However, private sector investment stayed in the lull as low capacity utilisation in the manufacturing sector and high leverage in the infrastructure sector deterred corporates from making fresh investments. Exports, which had briefly picked up in 2017 and the first half of 2018 with recovering global growth, slowed since the second half of 2018, as rising US-China trade tensions slowed global growth.

In FY19 in the last quarter the growth was dragged by sharp slowdown in fixed investment followed by private consumption and export growth. However the higher government consumption and slow import growth provided support. This brought the overall GDP growth estimate to 6.8% lower by 20 basis points than the

earlier estimate by Central Statistical Organisation. Growth was higher in the first half of fiscal 2019. The second half saw slower growth in agriculture, manufacturing, trade, hotels, restaurants, transport and communication services, construction and electricity and other utilities. That pared GVA growth down to 6% in the second half from 7.3% in the first. On the demand-side, growth in investments and private consumption decelerated. In effect, GDP growth slid 130 basis points to 6.2% in the second half, from 7.5% in the first to clock a total of 6.8% overall growth.

GDP to grow at a CAGR of 7.6% in next 5 years

Note: E-Provisional Estimates, P-Projected, Source: CSO (Central Statistical Organisation), IMF, CRISIL Research

CRISIL expects GDP growth to rise to 7.3% on-year in fiscal 2020, if monsoons are normal and well distributed and crude oil prices remain below US\$ 70 per barrel. We expect growth to be supported by softer interest rates and budgetary measures that push consumption.

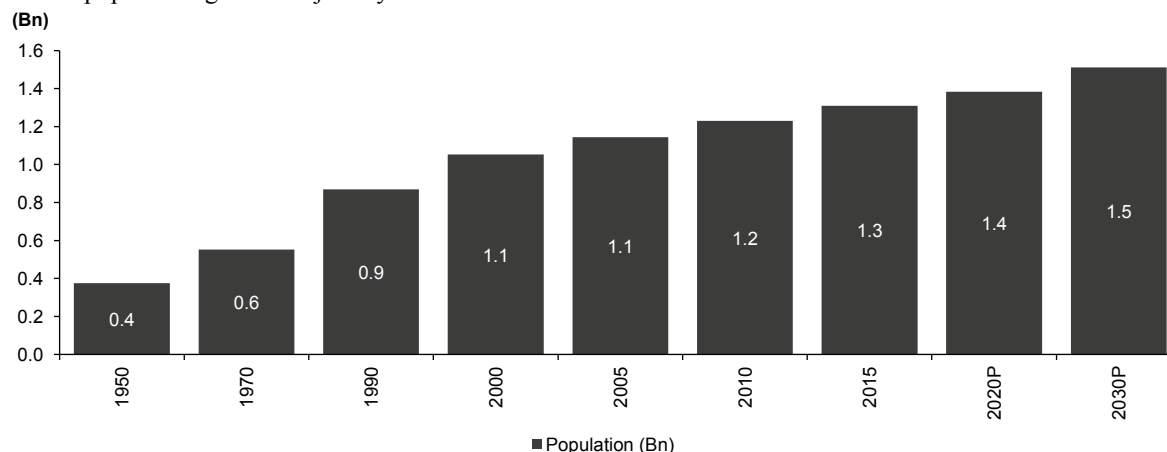

In the long term, growth will be driven by improving macroeconomic environment (softer interest rate and stable inflation), urbanisation, rising middle class, and key structural factors like business-friendly government reforms including GST (goods and services tax) and IBC (Insolvency and Bankruptcy code), 2016. The International Monetary Fund projects a 7.6% CAGR for the Indian economy over the next five years. Growth will be higher than many emerging economies, such as Brazil, Russia, and China.

Key growth drivers for Indian economy

India has the second-largest population in the world

As per Census 2011, India's population was about 1.2 billion, and comprised nearly 246 million households. The population, which grew nearly 18% between 2001 and 2011, is expected to increase about 11% between 2011 and 2025, to 1.4 billion.

Favourable demographics

Currently, India is also one of the nations with the highest young population, with a median age of 28 years. 90% of Indians will still be below the age of 60 by calendar year 2020. CRISIL Research estimates that 63% of this demographic will be between 15-59 years. Comparatively, the US, China, and Brazil had 74%, 62% and 78% of their population below the age of 60 (as of calendar year 2012). CRISIL Research expects that the existence of a large share of working population, coupled with rapid urbanisation and rising affluence, will propel growth of the Indian financial services sector.

Rise in urbanisation

The share of urban population rose steadily from 31% in 2011 to an estimated ~34% in 2019. CRISIL Research expects the pace of urbanisation to accelerate over the next five years, which will aid the rise in per capita GDP, as also suggested during the previous five years. Increasing urbanisation will enhance financial literacy and quality of living.

Faster growth in demand for financial products from semi-urban, rural areas

With increasing financial literacy, mobile penetration, awareness and the Prime Minister's Jan Dhan Yojana bank accounts (the scheme aimed at bringing the unbanked under the formal banking system) there has been a rise in the participation of individuals from non-metro cities. CRISIL Research expects technology to progressively reduce the cost of reaching out to smaller markets.

Gold loans

Regulatory tweaks restore shine for NBFCs

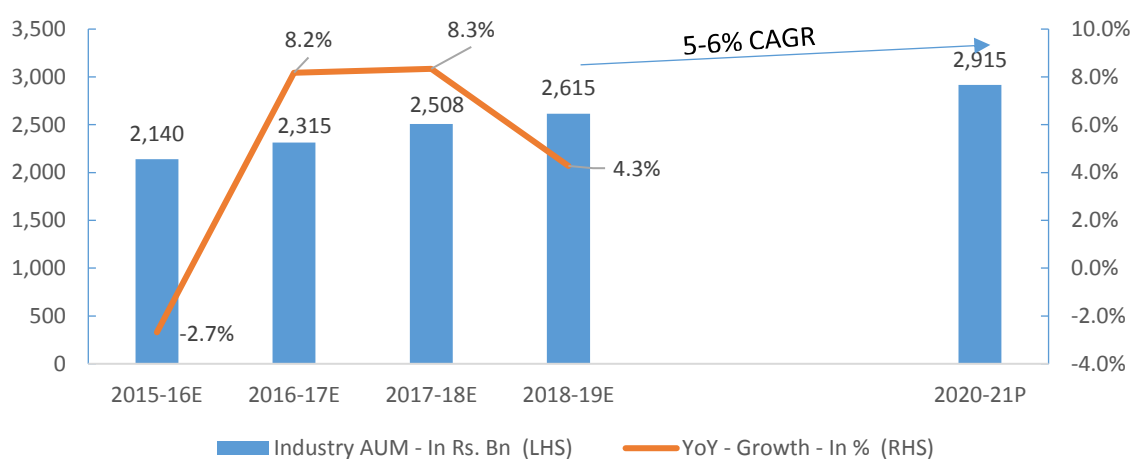

Gold loans are typically small ticket, short duration, convenient and instant credit. The unrestrained growth in the non-banking financial companies' (NBFCs') gold loan offtake was derailed by tighter regulatory environment between fiscal 2012 and fiscal 2014, and they lost considerable ground to banks and the unorganised sector. However, in the long term, the intervention strengthened the sector's ability to withstand price risk, improve customer service and standardise processes related to security valuation. It compelled NBFCs to reconsider their strategies. The loan to value (LTV) ratio was also reduced, thereby de-risking the business. There was focus on regular, monthly collection of interest, to preserve the lending margin against the backdrop of volatile gold prices.

The NBFC sector saw some stability in fiscal 2015. The Reserve Bank of India (RBI) had raised the permissible LTV ratio up to 75% in January 2014, from 60% earlier. Banks were also asked to cap the LTV ratio at 75% and standardise the procedures for valuing collateral. As of March 2018 NBFCs offer LTVs in the range of 65-75% with a leading player having a weighted average LTV of 67% for the fiscal. The LTV offered is based on the tenure of loan, interest charged and sensitivity of the customer to the LTV.

As of March, 2019 industry AUM grew ~4% YoY to reach 2.6 trillion on account of increased focus of players on diversifying their regional concentration, aggressive marketing and stable gold prices. The gold loan market is expected to log a compound annual growth rate (CAGR) of 5-6% over the next two years and cross ₹ 2.9 trillion by fiscal 2021, up from ₹ 2.6 trillion as of fiscal 2019.

Stable demand and initiatives to increase awareness are expected to help the industry grow moderately despite geographic concentration, slowing pace of growth from the north, west and east regions, and low penetration gains.

Banks growth driving industry growth

The regulatory changes also reflected in the organised sector's AUMs. A 3% fall in gold price along with RBI's restrictions in fiscal 2014 led to decrease in gold loan AUM growth to a marginal 2% from 28% in fiscal 2013; the AUM growth was stunted mainly on account of the steep fall in NBFC AUMs by 18%. However, despite a 6% decline in gold prices in fiscal 2015, gold loan AUMs grew 3% and NBFC AUMs recovered 9%, driven by

greater demand. This trend has continued in fiscal 2016 too: despite an average decline of 3% in gold prices, NBFC AUMs are estimated to have grown 4%. Industry AUMs, on the other hand, has recorded a 3% decline. Aided by a good monsoon and recovery in gold prices (by 12%) in fiscal 17 the gold loan industry received a much needed boost and the industry AUMs grew by a healthy 8% and NBFC AUMs reached the mark of 13% growth. Overall Industry AUM grew by 8.3% and 4.3% in fiscal 2018 and fiscal 2019 respectively.

We expect NBFC AUMs to grow at a marginally higher rate by 5-6% CAGR over 2 years till fiscal 2021 which will be supported mainly by rise in the stock of gold pledged and gold prices.

Non-traditional regions will contribute to growth, aided by players' marketing efforts. At the same time, players' ability to leverage technology and improve their online gold disbursements could help. Along with these drivers, a favourable economic scenario will also drive up funding needs of small businesses, and hence increase demand for gold loans.

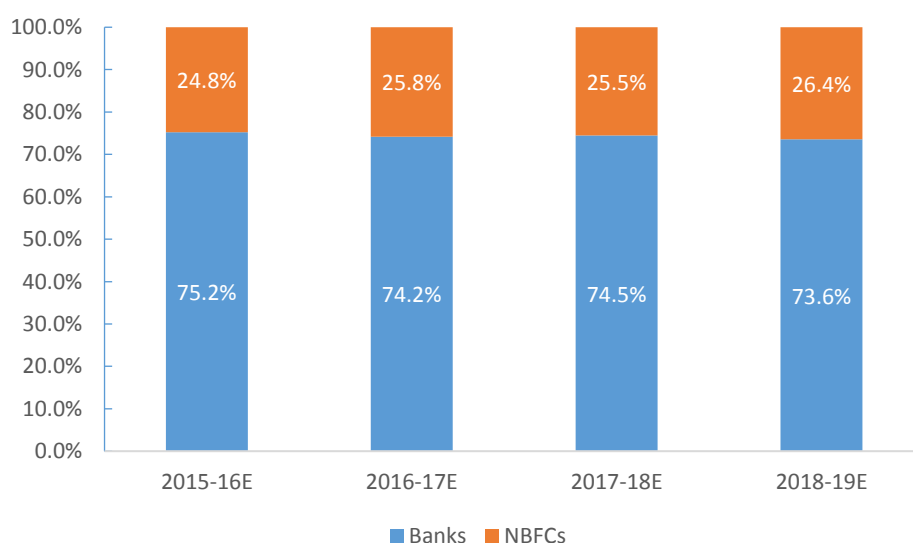

Specialized gold loan NBFCs have carved a niche space for themselves

Specialized gold loan NBFCs have witnessed exceptional growth amongst organized players. This growth is driven by aggressive expansion of branches, heavy spend on marketing and rapid acquisition of customers. NBFCs and banks approach the gold loan market differently, reflected in their interest rates, ticket sizes and loan tenures. NBFCs focus more single-mindedly on the gold loans business and have, accordingly, built their service offerings by investing significantly in manpower, systems, processes and branch expansion. This has helped them attract and serve more customers. Some of their advantages are:

- Less documentation enabling faster turnaround
- Adequate systems to ensure quick disbursals. For example, NBFCs have dedicated personnel to value the gold jewels at the branches.
- Flexible repayment options, wherein the borrower can pay both the interest and principal at closure of the loan.
- Greater accessibility due to better penetration, ability to serve non-bankable customers.

Single product focus on gold loans enabling them to develop strong appraisal and valuation expertise, resulting in faster and better customer service. Banks, on the other hand, have a more vigilant approach. They view gold loans as a safer means to meet their priority sector lending targets, especially agricultural loans. Even in the case of non-agricultural gold loans, they mostly target the organised segment or their existing customers as they are unable to offer flexible and rapid disbursals. For the above discussed reasons, NBFCs are preferred by customers over banks, and specialised NBFCs enjoy higher profitability. However, competitive intensity for specialised gold loan NBFCs have increased with increased retail focus of banks.

The gold loan market will continue to be attractive

The factors contributing to the attractiveness of gold loans are:

- Strong collateral, higher interest rate, lower cost, better return on investment
- Product diversification that compensates for lower offtake of auto, home loans
- Scope for cross-selling opportunities in future, including other gold-based products
- Opportunity to capture under-penetrated, untapped markets
- For these reasons, even SFBs have entered the gold loan market and are expected to increase competition in the coming years

South remains key market; even as other regions emerge

Demand for gold is skewed towards the southern states, as households here account for the largest share of accumulated gold stock in the form of ornaments, coins, bars, etc. Moreover, holders in the south are more open to pledging gold to raise funds than people in other regions. Although attempts by NBFCs to expand in certain pockets of northern and western India have lowered the share of southern markets, it still remains a stronghold. However, NBFCs will still have to contend with public sentiment against pledging gold and the distrust for financiers, as they look to expand beyond the south.

Profitability for non-banks to decline going forward

Profitability of NBFCs has bounced back after declining in the aftermath of tighter RBI regulations. There has been a steady decline in the cost of funds for NBFCs from 2012-13. Cost of funds declined due to reduction in lending rates by banks, which are the source of nearly half of NBFC borrowings. Profitability improved sharply in 2016-17, as increased business per branch improved the cost/income ratio. Demonetisation did affect profitability marginally but gold loan NBFCs limited the problem by offering alternative payment options to their customers till cash availability stabilised. The incremental cost of borrowing came down significantly. Profitability for NBFCs declined in fiscal 2019 as compared to fiscal 2018, on account of contraction in NIMs and reduction in fee income.

CRISIL Research expects the Profitability for non-banks to contract as competition is expected to increase on account of geographic concentration and limited scope for growth.

Opex expected to remain elevated as players are expanding their branches and increasing their marketing expenses.

Credit cost expected for NBFCs increased significantly over the years as players have migrated as per the new NPA recognition norms. CRISIL Research expect, the credit cost to reduce marginally going forward.

Low-ticket secured MSME loans

NBFCs driving growth in the segment

Since fiscal 14, overall MSME (micro, small and medium enterprises) credit growth has been consistently slowing down due to mounting concerns over asset quality and capital issues among public sector banks (PSBs). MSME lending revived in the first half of fiscal 2017 as demand rose, due to an increase in consumer spending, but growth was hit in the second half due to demonetisation. MSMEs were largely affected, as their cash dealings stopped. This affected the MSME credit growth of NBFCs (non-banking financial companies) too.

Low-ticket (ticket size \leq ₹ 10 lakh), secured MSME loans, including loans against property (LAP), have grown at a CAGR of ~12% between fiscals 2016 and 2019 to ₹ 958 billion with the entry of newer players in the space and players strong focus on expanding into smaller.

Growth and size of low-ticket secured MSME finance

Note: 1)- Above data includes secured MSME and lap portfolio (ticket size less than ₹ 10 Lakhs) for Banks and NBFCs. Source: RBI, Industry, CRISIL Research

Projected growth

CRISIL Research expects low ticket size secured MSME credit to grow at a CAGR of 15-18% over next 5 years. NBFCs credit is expected to grow significantly faster than that of banks. SFBs are expected to increase the competitive intensity of the segment, as they try to gain market share in MSME lending. Systems and process innovation, increasing online presence, and growing usage of analytics to analyse the creditworthiness of the customers will also support the growth.

Government initiatives

GST to boost demand in MSME lending

CRISIL Research expects transparency in MSME operations to improve, as compliance with GST will compel them to record their transactions. This will improve the quality of their books of accounts, thus boosting their credit worthiness. For financial institutions, this will ease the credit appraisal process and lower credit risk. Due to improvement in the quality of books of accounts, financial institutions will be able to lend to MSMEs in the unorganised sector, which were previously unable to get credit as books of accounts were not maintained properly or not maintained at all. This will open up previously untapped credit demand for financial institutions, leading to robust expansion of the MSME credit market.

Credit Guarantee Fund Scheme extended to cover NBFCs

One of the major reasons why MSMEs are credit-starved is the insistence by banks or financial institutions to provide collateral against loans. Collaterals are not easily available with such enterprises, leading to high risk perception and higher interest rates for them. In order to address this issue, the government launched the Credit Guarantee Fund Scheme, to make collateral-free credit available to micro and small enterprises. In January 2017, the scheme was extended to cover systemically important NBFCs as well. Key eligibility criteria for this scheme are: 1) the NBFC should have made profit for three preceding fiscal years at the time of enrolment; and 2) it should have long-term credit rating of at least BBB. There are a few other performance-related parameters too. Overall limit under the scheme has also been enhanced to ₹ 20 million.

Lower tax rates to boost MSME lending

Cut in corporate tax rates for MSMEs will boost the investment in the segment. MSMEs and retail borrowers should witness higher credit flow, as large corporates tap the bond market to meet the 25% target. Government support in the form of capital allocation, interest subsidy and tax rate cut will boost credit demand from the MSME segment.

Government initiatives addressing structural issues in MSME lending

Some of the structural issues plaguing MSME lending have seen a gradual work from the government perspective. Pradhan Mantri MUDRA Yojana and licences for trade receivables discounting system (TReDS) are some of the initiatives launched by the government to solve these structural issues. The RBI has also proposed to introduce NBFC-account aggregators, which has the potential to transform the MSME finance space by providing detailed granular insights into customer financial assets or borrowing history.

Recent government initiatives for boosting MSMEs

The government has taken many initiatives to support the growth of MSMEs in India and improve the flow of credit. Some of the initiatives are:

- Udyog Aadhaar memorandum: Paperless and online registration process for MSMEs with an aim to promote ease of doing business. It aims to increase coverage of MSMEs to avail benefits of various schemes of central/ state governments
- Stand-up India: It facilitates bank loans between Rs 10 lakh and Rs 1 crore to at least one scheduled caste or scheduled tribe borrower and at least one woman borrower per bank branch for setting up a greenfield enterprise
- Make in India: Launched with an intention to make India a global manufacturing hub, which in turn will provide employment to numerous youths in the country
- GST: Formalisation of MSME with GST gives lenders granular information about the entity for credit assessment and risk management. API access to GSTIN database to lenders aids in more efficient underwriting of MSMEs
- Mudra loans: To fulfil funding requirement of MSMEs who were earlier left out by financial institutions. Credit guarantee support also offered to financiers
- 59 minute loan: Online marketplace that provides in-principle approval to MSME loans up to ₹ 1 crore in 59 minutes. Uses advanced algorithms to analyse data from multiple data points such as GST returns and banking, without human intervention
- UPI 2.0: Real-time system for seamless money transfer from account. Enhances trust in digital transactions for customers as well as merchants. Has features such as linking to overdraft account and invoice in the inbox
- TReDS: Institutional mechanism to facilitate financing of trade receivables of MSMEs from corporates and other buyers through multiple financiers. Provides better price recovery and reduces working capital need of MSMEs

Growth drivers

Low credit penetration

India has around 60 million MSMEs, but only ~10% had access to finance, as of fiscal 2019, from organised lenders. High risk perception and the prohibitive cost of delivering services physically have constrained traditional institutions' ability to provide credit to underserved or unserved MSMEs historically. They are either self-financed or take credit from the unorganised sector. This untapped market offers huge growth potential for financial institutions. Breakdown of sources of funds for MSMEs is as follows.

Source: Sources of finance for MSMEs (6th Economic Census, 2013)

Improvement in economic scenario to boost funding needs of small businesses

MSME credit is largely extended to self-employed borrowers running small businesses, which mainly utilise funds for purchase of assets and expansion, and as working capital. CRISIL Research expects their demand for funds to grow, along with the economic growth, resulting in increased disbursements.

Lower competition prompts players to eye smaller cities

Competition in metros and Tier I cities is intense as all major players vie for market share. However, Tier II and III cities and smaller towns still remain under-banked or unbanked and are aggressively being tapped by NBFCs and SFBs. NBFCs stand a good chance to gain market share here given their ability to customise products, higher flexibility and better services.

Stable real estate prices a positive for LAP

Demand for LAP has a direct correlation to property prices and the real estate market. Stable property prices in Tier I and metro cities will support growth of the LAP market.

Competitive scenario – NBFCs’ share increasing

With private banks and NBFCs increasing their presence in tier-II and remote areas, they are capturing the market share from PSBs. PSBs’ credit growth has also weakened due to mounting bad debts. Since the size of loans are small, PSBs find the ratio of returns to cost of processing and cost of recovery less attractive. Additionally, private banks and NBFCs have now become more aggressive in terms of turnaround time for sanctioning and disbursement of loans, which is also pushing borrowers to these players. For an NBFC, it usually takes 1-2 weeks to sanction a loan and only 3-4 days to disburse the loan, while it takes 3-4 weeks to sanction a loan and another 1-2 weeks for disbursements in private banks. However, for a PSB, the turnaround time is usually 6-7 weeks for sanctioning the loan and another 2-3 weeks for disbursement.

With better data availability and refinement in credit assessment processes, private banks, SFBs and NBFCs have turned more aggressive in lending to this segment.

While banks still dominate working capital loans, NBFCs have managed to capture a share of asset-backed/hypothecated term loans and working capital loans over the past couple of years. SFBs are also targeting the micro and small segments of borrowers and directly competing with NBFCs.

The intense competition from SFBs notwithstanding, we expect NBFCs to gain market share as they provide customised loan offerings and credit assessment, which would help them to offer loans to unbanked and unorganised SMEs in smaller cities at lower interest rates compared with unorganised lenders.

Customers demand convenience and ease of finance

NBFCs have strengthened their presence in semi-urban and rural areas, which gives them extensive regional presence and understanding of the local markets, and helps them customise products to suit customer needs. This regional presence in untapped territories helps them reach out to the unorganised sectors. With low turnaround time, better service, NBFCs are better able to meet customer demand for convenience.

Entry of SFBs have increased competitive intensity

As the RBI has mandated that 50% of the loan portfolio of SFBs should be below ₹ 25 lakh, they are going to increasingly target the micro and small segments of borrowers.

Market trends

Demand for unsecured credit on the rise

About 75-80% of the MSME lending by non-banks is secured. The security is majorly provided through primary collateral, such as plant, machinery and current assets. To add another layer of security, secondary collateral is also collected in the form of immovable assets.

Unsecured loans have also become a focus area for some NBFCs. Since property prices have not increased over the past few years, the ability of borrowers to offer higher collateral has declined. Hence, many NBFCs are offering their existing secured borrowers an unsecured line of credit. A few NBFCs provide unsecured loans as a bridge finance for clients who are securing loans from banks but have an urgent requirement to fulfil, due to which they cannot wait until the loan is sanctioned. A few aggressive NBFCs focus heavily on unsecured loans to increase yields and improve profitability.

Online channel leads to a rise in sourcing of unsecured loans

NBFCs have started giving small-ticket unsecured loans from the digital platforms. Generally the average ticket size of the loans through online channels is ₹ 15 lakh. The digital platform is very efficient in terms of documentation and turnaround time. This helps the NBFCs attract customers and broaden their customer base at a fast pace. The share of unsecured loans in NBFCs' MSME portfolios is expected to rise in the coming years, as new customers increasingly demand unsecured loans.

Lending dynamics in unsecured loans

Banks and NBFCs are cautious about unsecured loans to MSMEs. These loans are taken by MSMEs to meet urgent business requirements and for meeting the working capital. Lenders give unsecured loans for short tenures, generally 2-4 years, and demand a higher rate of interest compared with secured loans. Some financial institutions make it mandatory to have a co-applicant for an unsecured loan. Financial institutions also make sure about the credit profile of MSMEs and carry out a stability/vintage check of firms. Financial institutions generally prefer to give unsecured loans to the existing customers.

End-use varies among NBFCs and banks

Due to regulatory restrictions, NBFCs are not able to provide working capital loans to MSMEs. Hence, 100% of their portfolio is in the form of term loans. However, as per our industry interactions, though loans are taken in the form of term loans, end-use of the funds is primarily to fulfil working capital requirements. However, no such restriction exists for banks, as a result of which 75-80% of the loans are working capital loans, and the remaining are term loans for large banks.

Average ticket size

The estimated average ticket size for an MSME loan for NBFCs is typically ₹ 6-7 million, as of fiscal 2017, but some NBFCs have an average ticket size of above ₹ 10 million. Further, the average ticket size has been stable over the past 2-3 years as NBFCs are giving lower ticket size loans to new clients, who form a large part of the incremental lending, and higher ticket size loans of around ₹ 20 million to existing clients and large players, which have an established repayment history and strong business profile. For mid and small-sized players, loans of ticket size ₹ 1-1.5 million are also offered. SFBs have entered the MSME segment.

Personal loans

Personal loans are collateral free loans to meet the personal needs of an individual. They are sanctioned on the basis of the borrower's credit score, social credentials and income. While the risk here is high for the lender, the high rate of interest compensates for the risk. The personal Loan market witnessed a sharp slowdown and was marked with high defaults during fiscal 2008 but after that it has seen significant growth in the past few years. Earlier, personal loans were generally viewed to be loans taken mostly for emergency purposes, such as marriages, medical or some pending home improvement expenses. Over the last five years, personal loans have become quite common and are being increasingly sought for fulfilling customer aspirations of dream vacations, leisure and entertainment as well as for acquiring latest gadgets.

The personal loans market grew significantly faster than the overall system credit and system retail loan segment in India over the past couple of years, driven by strong macroeconomic environment, increasing formalisation of the economy, higher-spending habits, low rates, ease in availability of credit and further supported by adoption of technology in credit appraisal. The market size of personal loan segment (including lending by banks and NBFCs) of ticket size less than ₹ 2 Lakhs is estimated to be ₹ 814 billion as of March 2019. The market has grown at a compounded annual growth rate (CAGR) of 30-35% between fiscals 2017 and 2019.

Competitive scenario

The personal loan segment has become highly competitive over the past couple of years with both banks and NBFCs getting aggressive in this segment, which offers good risk-reward potential. NBFCs have grown much faster than banks over past few years, partly supported by low base and the advent of new players in this segment. Large NBFCs focus on individuals with a good repayment capability (mostly salaried customers). However, there are many small NBFCs, which are present in semi-urban and rural areas and lend small ticket-sized personal loans to customers with low or no credit score and charge relatively high interest rates to compensate for the risk. NBFCs account for 15-20% market share in the personal loan segment (ticket size less than ₹ 2 Lakhs) in India as of March 2019. Bank too have increased their focus on personal loan segment amid slowdown in corporate loan demand, with private banks relatively more aggressive than public sector banks. Most PSU banks lend only to their existing customers, who have some kind of relationships with them, whereas private banks leveraging their digital platforms also try to scouts for new customers with a strong repayment capability.

Key success factors in the personal loan market are:

- Turnaround time - This is the most important parameter for any customer. Disbursements in the best case happen within a few hours of application. However, on average, it takes 1-3 days to disburse the loan.

- Digital and technology platform – Most salaried individuals and new generation individuals are tech savvy and prefer a digital platform where there is no requirement of paper work or visit to the branch.
- Interest rates – It mainly depends on the customer profile and their underlying credit score.
- Existing customer base – Players cross selling to their existing customers to maintain asset quality.

Banks constitute more than 80-85% of the personal loan segment (March 2019E)

Source: Company reports, Industry, CRISIL Research

Peer-to-peer lenders, who have started their business in the past few years, also compete in this segment by playing the role of intermediary and connecting lenders (both individuals and institutional players) and borrowers, who are usually netizens. They operate as a digital finance organisation and the majority of their checks happen through digital footprint with very little or zero paper work. Their loan book, which is currently minuscule compared with the industry, is growing at a very fast pace and can be a potential threat to traditional lenders in the long term.

Customer profile

According to CRISIL Research, more than 80% of the customers in this segment are salaried and this could be explained by the fact that financial institutions have a better sense on the creditworthiness of the salaried customers, as they are able to track and analyse monthly balances, spending on credit and debit cards linked to their salaried accounts. Self-employed personnel are perceived to be more risky customers, due to their uncertain nature of job and unknown factor of creditworthiness, hence they form a smaller chunk of the total segment. Within self-employed segment, the self-employed professionals form a larger pie (for example, CAs, lawyers, doctors and professionals running their own practice).

Personal loan features/characteristics

Interest rate

- Interest rate depends on the repayment capability of the customer
- Average interest rates ranges between 12-14% for salaried customer
- For self employed customer with no or low credit score, rates can go more than 20%

Processing fees

- Average processing fees is between 1-3%

Foreclosure charges

- Most of the players charge 2-4% charge if the loan is prepayed or foreclosed after one year
- In most of the cases, this charge is higher if the loan is closed within one year

Ticket size

- Average personal loan ticket size is Rs 3-4 lakhs
- Personal loans ticket size in urban areas is much higher compared to semi-urban and rural areas

Tenure

- Typical tenure for personal loans ranges between 2-5 years
- However for very small ticket size loans, tenure can less than 1 year

Turnaround time

- It usually takes 1-4 days to disburse a loan
- Disbursement can happen within a day for certain customers who already have relationship with the lender

Sourcing strategy

- Digital medium (online and pre – approved route), Branch walkins and cross-sell and DSAs are the ways of acquiring customers
- Digital medium is increasingly gaining momentum

Personal loan segment to continue to grow at a strong pace in the medium term

CRISIL Research expects the growth momentum in the personal loans segment to continue in the medium term mainly driven by change in lifestyle and spending habits of consumers and increase in product awareness and availability of credit. We expect the personal loan market (less than ₹ 2 Lakhs ticket size) to grow by 22-25% CAGR over the next five years and reach ₹ 2.2 trillion by fiscal 2024.

Growth drivers

Tech enhancements enables in reduction of TAT

Players are enhancing their tech ability to offer customised products as per the need of customers in lesser time.

Increased focus on untapped regions

Players are aggressively expanding their reach in tier -2 and tier -3 cities in order to tap the areas which are largely untapped.

Change in lifestyle and spending habit

Favourable demographics, rise in income, higher spending habit coupled with change in mindset to satisfy needs by availing credit augurs well for the personal loan market.

Increasing push by financial institutions

With the slowdown in corporate loans, financial institutions are aggressively pushing for personal and other retail loans as it they offer a good risk reward ratio.

Increase in availability of credit score

A consistent increase in the availability of information about profiles and track record of retail borrowers gives confidence to the financial institutions while lending.

Rationalisation of interest rates

Money lenders offer personal loans at exorbitant rates. A decrease in interest rate cycle and rationalisation of personal loan rates over the past few years will favour borrowers to choose formal lenders over money lenders.

Faster approval process

Personal loans get approved faster since there is no requirement of collateral. Digitisation has further increased the speed of the whole process. Many lenders also offer pre-approved personal loans to salaried individuals who have savings account with them which depends on the individual's salary, credit score and spending habits.

Key risks

The major risk while lending personal loans are that they are not secured and in the event of default there is no collateral to recover the money. Other major threat to the traditional lenders are the emergence of P2P lenders and fintech companies.

Microfinance loans

Rising penetration to help industry grow at a ~25% CAGR in the next two years

As at the end of March 2019, the micro finance industry has a total gross loan portfolio of ~ ₹ 1.9 trillion. It grew by 34% annually over the same period last year. The number of micro finance accounts stood at 9.33 Cr growing at 22% from last year when they were 7.66 Cr.

The domestic microfinance industry has a huge opportunity to capture share from unorganised players, by growing their portfolio and covering areas that are least penetrated.

Growth in client base and average ticket size to drive MFI loan portfolio

(In Rs. bn)

Source: Bharat Microfinance, MFIN, CRISIL Research

We expect the MFI loan portfolio to grow at a ~25% CAGR from fiscal 2019 to fiscal 2021, much lower compared with the past three years as rural areas in well-penetrated states mature and the focus of some top players, converting into SFBs, shifts towards selling other banking products. The growth forecast is calculated excluding the impact of any external factors that may hinder the growth of micro finance NBFCs. The future GLP growth of microfinance NBFCs is also contingent on the availability of adequate capital.

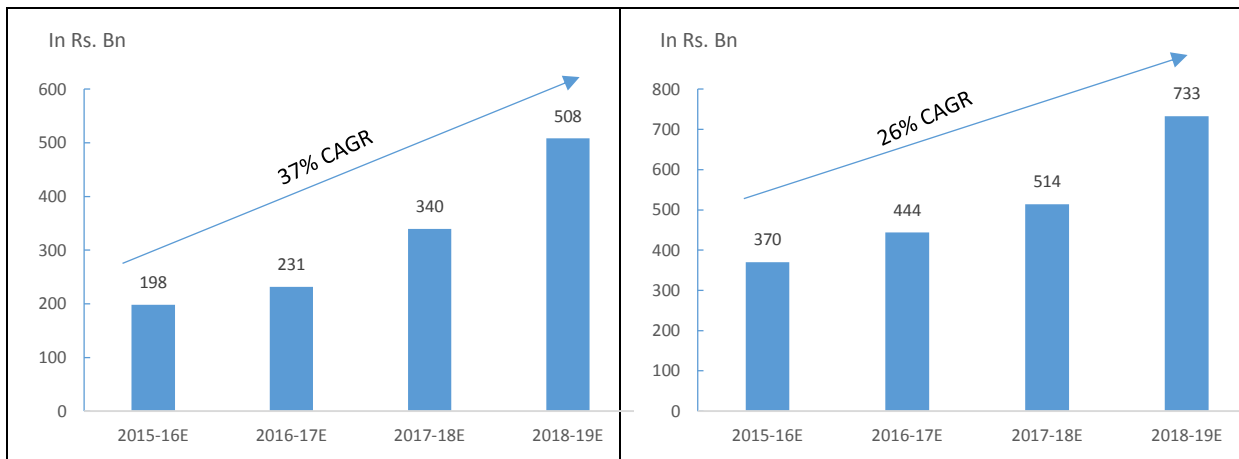

Factors that will define the success in future are:

- Ability to attract funds and maintain healthy capital position
- Strong promoters who have witnessed various business cycles and successfully tackled events
- Loan recovery and control aging of NPAs
- Geographic diversification
- Adoption of technology to improve efficiency and lower costs
- Ability to manage local stakeholders

NBFC-MFIs to grow faster than SFBs

Growth in GLP of NBFC-MFIs

Growth in GLP of players with SFB licence

Note: 1) Above industry sizing only includes Small Finance Banks (SFBs). 2)-For Jana SFB, Utkarsh SFB and Suryoday SFB advances are considered 3) – For NBFC-MFIs industry sizing excludes BFIL.

Source: MFIN, CRISIL Research

Players without an SFB licence, have grown at 37% CAGR in the last four years, relatively faster than 26% (four-year CAGR) growth of players with an SFB licence, as the latter are trying to diversify their portfolio beyond microfinance loans. We expect players with an SFB licence to grow at a rate of ~23-25% CAGR over next two years, compared with a ~28-30% CAGR for NBFC-MFIs. SFBs licencees are required to adhere to stricter norms and compliance, which would impact their growth in the initial years of their conversion. Limited or no exposure towards managing the liability side of the business would also be a challenge for SFBs licencees.

MFIs expanding aggressively, tapping newer states and districts to widen client base

Many MFIs have started exploring newer states and are opening new branches in untapped districts, which is increasing overall penetration. Because of aggressive expansion plans of some big players, we expect the penetration to deepen further. Also, we expect number of players in states/union territories (UTs) to increase. The number of states/UTs catered to by NBFC-MFIs (including SFBs) has also risen from 27 in fiscal 2013 to 36 in fiscal 2019.

Among the top 10 states, Rajasthan has registered highest increase of 75% in number of branches in fiscal 2019 followed by West Bengal with 70% growth. States such as Goa, Sikkim, Meghalaya, Arunachal Pradesh, Jammu and Kashmir (J&K), Mizoram, and Nagaland are relatively under-penetrated. Some MFIs have begun operations in these states, furthering financial inclusion.

Due to an increase in the number of branches, penetration has gone up significantly, resulting in extraordinary growth in gross loan portfolio in some states; many other states have also registered significant growth compared with the last year.

Source: MFIN, CRISIL Research

States like J&K, Meghalaya, Tripura, Delhi and Assam have registered an extraordinary growth on account of relatively smaller base and increased focus of players in these states. The high growth in both number of branches and number of clients has also increased the overall gross loan portfolio in each state.

Top 10 states with 84% market share in 2018-19

Source: MFIN, CRISIL Research

The top 10 states have seen ~44% growth from last year due to high presence of MFI players and focus of some top players in these states on increasing penetration and higher ticket sizes. About 84% of the gross loan portfolio is concentrated in top 10 states with Karnataka (14%), Bihar (14%), Odisha (13%), Maharashtra (11%) and Uttar Pradesh (11%) recording highest shares.

Competitive dynamics

NBFC MFIs have grown the fastest in the MFI industry

There are multiple players in the microfinance industry with varied organisational structures. Loans in the microfinance sector are provided by banks, NBFCs-MFIs, other NBFCs, and non-profit organisations. Banks provide loans under the self-help group model, however they also give microfinance loans directly or through business correspondents in order to meet their priority sector lending targets.

MFIs continue to gain market share compared to the bank-SHG linkage programme

Banks have a strong presence in the microfinance industry, directly as well as indirectly. While lending to borrowers, MFIs focus on the joint lending group (JLG) model as it is easier to form such groups, whereas banks have a dominant presence in the self-help group (SHG) model through their self-help group-bank linkage programme (SHG-BLP).

The total credit outstanding under SHG-BLP as of March 2018 was ₹ 756 billion which signifies a growth of ~23% over FY17. Although, outstanding loans under SHG-BLP have grown significantly, growth is relatively low compared with NBFC-MFIs (including SFBs).

MFIs increased their market share from 39% to 58% between fiscals 2015 and 2018, following greater regulatory clarity and demand for loans from states, other than Andhra Pradesh. The growth rate of MFIs is expected to remain higher, which will increase their market share in next two fiscals.

Growth drivers in microfinance industry

Huge potential market, sustainable model - growth drivers for MFIs

Within the large suite of products and services under financial inclusion, microfinance institutions have a major role to play in the provision of credit. The sheer size of the market (in terms of financially-excluded households), a business model that offers sustainable credit to the poor at affordable rates and a repayment cycle spread over a longer duration, have been key growth drivers for MFIs operating in India.

- **Huge unbanked population and low finance penetration in the country:** Given the sheer size of the Indian population and considering that a large section still lacks access to formal banking services, driving financial inclusion has always been a key priority for the government. The banking system and 'priority sector' lending have been the most explored channels to bring majority of the population under the ambit of formal credit institutions.
The global average of adult population with an account (at a bank, financial institution or with mobile money providers) is about 62%. India is far behind at about 53%. However, its average is above that of South Asia, which is relatively low at about 46% due to poor financial inclusion, especially in some of India's neighbours. As per the global Findex database (2014), 21% of the world's unbanked adults are from India, constituting almost 420 million unbanked adults. This is the highest in the world, much higher than China's 240 million unbanked adults, considering the total global unbanked population as 2 billion.
- **Key government initiatives:** The government is taking a number of initiatives to improve the financial inclusion in the country by supporting the microfinance institutions in various ways. Pradhan Mantri Jan Dhan Yojana (PMJDY) and Pradhan Mantri Mudra Yojana (PMMY) are the two key schemes in this regard.
- **Adoption of new technologies and digitisation:** Digitalisation has impacted almost all aspects of the financial services industry. However, it is far more critical for the MFI industry since lower operating costs can result in higher financial inclusion and increased benefits for customers. The use of technology has helped MFIs grow at a fast pace, improve efficiency, lower the usage of cash, lower turnaround time, develop new products, provide better service to customers and use analytics for portfolio monitoring and credit appraisal. Further development in the area of digitisation will help in expanding the reach of MFIs.
- **Diversified products and services:** Up until now, the offerings of microfinance institutions were limited, but companies in the market are rapidly expanding their portfolios by joining up with pension, remittance, and insurance providers to cross-sell products. This allows MFIs to market themselves as a one-stop solution for the financial requirements and catering to a wider range of clients along with better stickiness in the market. A wider range of product offerings by companies will help them in attracting more and more customers and it will act as a key growth factor for them.
- **Group lending model helps MFIs widen the reach to low-income households:** Even as banks have been the traditional source of funds, constraints in the form of varying income levels, absence of collateral and significant fixed operational cost in proportion to small-ticket loans have limited their geographical and demographic reach. To effectively tackle issues faced by conventional bank lending models, MFIs adopted an alternative operating mechanism in the form of group lending models, such as JLGs and SHGs. These models are based on certain common principles, such as identifying individuals with similar credit requirements and using peer pressure to curb delinquencies.

Furthermore, in comparison with banks, MFIs are able to charge higher interest rates to cover the financing and operational costs, and yet maintain sustainable profit margin. In a nutshell, MFIs have been able to provide a viable alternative mechanism to drive the financial inclusion agenda.

We have established an effective process for origination, monitoring and collecting receivables which enable us to generate stable growth with control over the asset quality. We adhere to a strict set of market survey and location guidelines while selecting branch sites to ensure that our branches are set up close to our customers. We believe that our customers appreciate this convenience, as well as extended operating hours that we typically offer, which are often more compatible with our customers' work schedules.

Our target customers mainly hail from rural/semi-urban area. We have adopted distinguished and cost effective business origination policy, where we originate the business through our branch networks in association with marketing officers termed as customer service points. These customer service points are local residents of the area and have the domain knowledge of that area. They identify potential customers in defined area and maintain long term relationship with the existing customers. Each of our branches is staffed with persons who possess local knowledge and understanding of customers' needs and who are trained to appraise collateral and disburse loans within a short span of time. Although disbursement time may vary depending on the loan ticket size and the security pledged. We believe our customer service and response time are our key competitive strengths that differentiate our services and products from those provided by commercial banks.

Effective risk management system including appraisal, internal audit and inspections.

Risk management forms an integral part of our business as we are exposed to various risks relating to our business. The objective of our risk management system is to measure and monitor the various risks we are subject to and to implement policies and procedures to address such risks. We have an internal audit system which consists of audit and inspection, for risk assessment and internal controls. The audit system comprises of accounts audit and loan appraisal. In accordance with our internal audit policy, our branches are subject to surprise audit every month on random basis. We have designed stringent evaluation process and credit policies to ensure the asset quality of our loans and the security provided for such loans. Our credit policy comprises classification of target customers in terms of track record, classification of assets, differentiated loan to value ratio for different class of customers and assets, limits on customer exposure etc. Further, in order to build quality assets and reduce NPA level, we have developed a culture of accountability by making our marketing officers responsible for loan administration, monitoring as well as recovery of the loans they originate.

For effective and timely portfolio management, we have put in place a centralized risk analytics team publishing credit and portfolio performance reports for management's review. We utilise advance statistical tools like customer behaviour scorecards for early identification of potential risks in our portfolios and to take corrective actions accordingly as required. The reports provide detailed information on various portfolio segments and ascertain the risk. In addition, periodic collection reviews are conducted on delinquent customers and segments to identify and evaluate any problem areas, to drive collection efficiencies and future acquisitions.

Our senior managers have an in-depth understanding of the specific industry, products and geographic regions they cover, which enables them to appropriately support and provide guidance to our employees. For further details, refer to “*Our Management*” on page 104.

Our Strategies

Our business strategy is designed to capitalize on our competitive strengths and enhance our market standing. Key elements of our strategy include:

Growth of the business through increasing geographical presence in rural and semi-urban areas

We intend to continue to grow our loan portfolio by expanding our network through the addition of new branches. In order to optimize our expansion, we carefully assess potential markets by analyzing demographic, competitive and regulatory factors, site selection and availability, and growth potential. A good reach to customers is very important in our business. Increased revenue, profitability and visibility are the factors that drive the branch network. Currently, we are present in key locations which are predominantly in South India for sourcing business namely Kerala, Karnataka and Tamil Nadu. Our strategy for branch expansion includes further strengthening our presence in South Indian states by providing higher accessibility to customers as well as leveraging our expertise and presence in southern Indian states. As a strategy, we will continue to leverage on the infrastructure provided by entities operating under the ‘KLM’ brand name. We expect that our diverse revenue stream will reduce our dependence on any particular product line thus enabling us to spread and mitigate our risk exposure to any particular industry, business, geography or customer segment. Offering a wide range of products helps us attract more customers thereby increasing our scale of operations. At the core of our branch expansion strategy, we expect to penetrate new markets and expand our customer base in rural and semi-urban markets where a large portion of the population has limited access to credit either because they do not meet the eligibility requirements of banks or financial institutions, or because credit is not available in a timely manner at reasonable rates of interest, or at all. A typical loan customer expects rapid and accurate appraisals, easy access, quick approval and disbursement. We believe that we meet these criteria when compared to other money lenders, and thus our focus is to expand our loan financing business. At the core of our branch expansion strategy, we expect to penetrate new markets and expand our customer base to include customers who otherwise would rely on the unorganized sector.

Further strengthen and grow our gold loan and microfinance business

Our Company started offering customized loans to small enterprises finance segment in 2013-14 and has continually focused on expanding our customer base for this product since then. We see a significant opportunity for our Company to expand our customer base in small enterprise finance segment. We intend to focus on the industry opportunity and leverage our established presence to further grow our gold loan and microfinance business. As per CRISIL report dated July, 2019, on the “Industry report on gold loans, low-ticket MSME loans, personal loans and microfinance loans”, as of March, 2019 Gold Loan industry AUM grew ~4% YoY to reach ₹ 2.6 trillion on account of increased focus of players on diversifying their regional concentration, aggressive marketing and stable gold prices. The gold loan market is expected to log a compound annual growth rate (CAGR) of 5-6% over the next two years and cross ₹ 2.9 trillion by fiscal 2021, up from ₹ 2.6 trillion as of fiscal 2019..

Further, given the sheer size of the Indian population and considering that a large section still lacks access to formal banking services, driving financial inclusion has always been a key priority for the government. The micro finance industry has a total gross loan portfolio of ₹ 1.9 trillion, as at the end of March 2019. It grew by 34% annually over the same period last year. The number of micro finance accounts stood at 9.33 crore growing at 22% from last year when they were 7.66 crore. The domestic microfinance industry has a huge opportunity to capture share from unorganised players, by growing their portfolio and covering areas that are least penetrated. CRISIL expects the MFI loan portfolio to grow at a ~25% CAGR from fiscal 2019 to fiscal 2021, much lower compared with the past three years as rural areas in well-penetrated states mature and the focus of some top players, converting into SFBs, shifts towards selling other banking products.

We intend to focus on the industry opportunity and leverage our established presence to further grow our gold loan and microfinance business,

To implement advanced processes and systems

We intend to invest in our existing technology systems and processes to create a stronger organization and ensure good management of customer credit quality. We also intend to invest in our technology-enabled operating procedures to increase operational and management efficiencies as well as ensure strong customer credit quality. Our focus on the effective use of technology is aimed at allowing employees across our branch network to collect and enter data to a centralized management system, providing our senior management real-time access to credit processing and decision making. We continue to implement technology led processing systems to make our appraisal and collection processes more efficient, facilitate rapid delivery of credit to our customers and augment the benefits of our relationship based approach. We also believe that deploying strong technology systems will enable us to respond to market opportunities and challenges swiftly, improve the quality of services to our customers, and improve our risk management capabilities. Our Company has entered into an agreement with L Code, a software company based at Mangalore for implementing an ERP system. We believe that the accurate and timely collection of such data gives us the ability to operate our business in a centralized manner and develop better credit procedures and risk management. As we continue to expand our geographic reach and scale of operations, we intend to further develop and invest in our technology to support our growth, improve the quality of our services and achieve superior turnaround time in our operations.

Further strengthen our risk management and loan appraisal

We believe risk management is a crucial element for further expansion of our Loan business. We therefore continually focus on improving our integrated risk management framework with processes for identifying, measuring, monitoring, reporting and mitigating key risks, including credit risk, appraisal risk, custodial risk, market risk and operational risk. We plan to continue to adapt our risk management procedures, to take account of trends we have identified. We believe that prudent risk management policies and development of tailored credit procedures will allow us to expand our Loan financing business without significantly increasing our non-performing assets. Since we plan to expand our geographic reach as well as our scale of operations, we intend to further develop and strengthen our technology platform to support our growth and improve the quality of our services. We are focused on improving our comprehensive knowledge base and customer profile and support systems, which in turn will assist us in the expansion of our business.

Our Business Operations

Gold Loan

One of our primary business is disbursement of gold loans, which are typically small ticket loans collateralized by gold jewellery. For the financial years ended March 31, 2019, 2018, and 2017, income from interest earned on our gold Loans constituted 26.82%, 26.03%, and 24.89%, respectively, of our total income.

Loan disbursement process

The principal form of collateral accepted by us is gold jewellery. The amount that we finance against the security of gold jewellery is typically based on the value of the jewellery. We value the gold jewellery brought by our Gold Loan customers based on our centralized policies and guidelines, including policy on interest rate fixation. We currently lend upto 75% of the value of the jewellery. We appraise the jewellery collateral solely based on the weight of its gold content, excluding weight and value of the stone studded in the jewellery. Our gold loans are therefore well collateralized because the actual value of the collateral in all cases are generally higher than our appraised value.

The amount we lend against an item and the total value of the collaterals we hold fluctuates according to the gold prices but not exceeding the LTV ratio as prescribed by RBI from time to time. However, an increase in gold price will not result automatically in an increase in our gold loan portfolio unless the per gram rate are revised by our corporate office. Similarly, since adequate margins are kept at the time of disbursement of loan, a decrease in the price of gold has little impact on our interest income. However, a sustained decrease in the market price of gold may decrease in the size of our subsequent loan portfolio and our interest income.

We rely on the disposition of collateral to recover the principal amount of an overdue gold loan and the interest due thereon. We also have recourse against the customer for the loan. Since the disbursement of loans is primarily based on the value of collateral, the customer's creditworthiness is not a factor in the loan decision. However, we comply with 'know your customer' norms adopted by the Board and require proof of identification and address proof. We also photograph customers with web-cameras installed in our branches.

All our gold loans have terms of 12 months. However, our customers have the option to redeem the loan at any time during the period of loan tenure. In the event that a loan is not repaid on time and after providing due notice to the customer, the unredeemed collateral is disposed of on behalf of the customer in satisfaction of the principal and all interest charges. In general, collateral is disposed of only when the recoverable amount is equal to or more than the realizable value of the collateral.

Loan appraisal process

Our gold loan approval process is generally linked with the appraisal of gold jewellery that serves as collateral, which takes only a few minutes. Each of our branches is staffed with persons who have been trained and have experience in appraising the gold content of jewellery. The appraisal process begins with weighing the jewellery using calibrated weighing machines. Jewellery is then subject to prescribed primary tests for the quality of gold, including stone tests and acid tests, followed by additional tests, if required, such as salt tests, sound tests, weight tests, pointed scratching tests, flexibility tests, color tests, smell tests, usability tests, magnifying glass tests and finishing tests. Once the jewellery passes these tests, loans are disbursed based on the rates per gram of gold approved by the corporate office.

Our customers are provided the option to accept loan disbursements in cash or by cheque, as permissible under RBI guidelines. At the time of disbursement, an undertaking is signed by the customer. It states the name and address of our Company's relevant branch office and the customer, a detailed description of the gold jewellery provided as collateral, the amount of the loan, the interest rate, the date of the loan, and other terms and conditions.

The pledged gold jewellery are separately packed by staff of the branch, and then placed in a polythene pouch with the relevant documents on the loan and the customer and stored in the safe or strong room of the branch. The safes and strong rooms in which the gold jewellery is kept are built as per industry standards and practices. The strong rooms are vaults with reinforced concrete cement structures. Currently, almost all of our branches are using strong rooms or safe vaults.

We monitor our loan accounts and recovery of dues on an ongoing basis. Once a loan is fully repaid, the pledged gold jewellery is returned to the customer. When a customer does not repay a loan on or before its maturity, we initiate the recovery process and dispose of the collateral to satisfy the amount owed to us, including both the principal and the accrued interests. Before starting the recovery process, we inform the customer through registered letters or legal notices.

When a loan is repaid, we give the customer an option to pledge the security again and obtain another loan. The procedure of re-pledging entails the same procedure as that of a pledge and is accompanied by the same mode of documentation that a pledge entails. If the loan is not repaid when the loan falls due, we are able to sell the gold collateral in satisfaction of the amount due to us. We also reserve the right to sell the collateral even before a loan becomes past due in the event the market value of the underlying collateral is less than amounts outstanding on the loan, after serving notice to the customer.

Micro, small and medium enterprises loan (“MSME Loan”):

Currently, we offer business loans to the micro, small and medium enterprises segment for a tenor of upto 40 months. Our target customers in the micro, small and medium enterprises segment typically comprises self-employed professionals, wholesale and retail dealers, merchants, small and medium scale manufacturing concerns etc. Our MSME Loan segment is typically customized to suit the requirements of our customers after having assessed and understood their business model. As of March 31, 2019, we had aggregate principal balance of ₹ 13,586.81 lakhs. For the financial years ended March 31, 2019, March 31, 2018, and March 31, 2017, our MSME loan portfolio yield representing interest income on MSME loans as a percentage of average outstanding of MSME loans, for the same period were 20.43%, 23.73%, and 29.04%, respectively, per annum.

We believe that the MSME Loan segment is still under banked to a large extent and barring certain public financial institutions and public sector banks, lending in this sector has traditionally been addressed by the unorganized players in most regions in India. Accordingly, we see a significant opportunity for our Company to expand our customer base in MSME segment.

Personal Loan

We provide personal loan to our existing and new customers. Our officials reach out directly to our personal loan customers and visit them at their doorstep to carry out loan origination and credit evaluation, so as to ensure speedy processing of loans. We target customer segments who do not have easy access to bank or other modes of financing for immediate short or medium term funding requirements, within reasonable time or at all. The average tenor for such loans is typically upto 20 months. As on March 31, 2019, the assets under management for personal loans was ₹ 6,285.06 lakhs, which represented 16.81% of our total assets under management as at that date.

Microfinance

In the Fiscal 2017, we have introduced microfinance operations entail providing micro credit lending to our women customers who are predominantly located in rural and semi-urban areas and the purpose of loans sanctioned to them is mainly for utilisation in small businesses or for other income generating activities but not for personal consumption. Primarily, we utilise a clustered group lending model to provide unsecured loans to our customers. This model relies on a form of ‘social collateral’ and ensures credit discipline through peer support within the group. This model presupposes our members being prudent in conducting their financial affairs and prompt in repaying their outstanding borrowings. Further, in order strengthen our microfinance business, our Company has entered into a memorandum of understanding dated August 6, 2018 for acquisition of Palma Development Finance Private Limited, NBFC - MFI registered with RBI under non-deposit accepting company category.

We provide microfinance loans up to ₹ 0.35 lakhs each to a group of 10 – 15 women customers for their business needs. A customer is eligible for a subsequent cycle of the loan if their track record of repayment is good and meets certain other requirements relating to their conduct within the group. In addition, we also extend midterm loans to certain eligible microfinance customers, based on their requirements. All our microfinance loans are offered at fixed interest rates, with principal and interest typically payable in weekly instalments. Interest rates for our microfinance product offerings are a function of our operating and funding costs, in particular our personnel and administrative costs, as well as the RBI limits on microfinance loan interest rates. As on March 31, 2019, the assets under management for microfinance loans were ₹ 2,511.30 lakhs, which represented 6.72 % of our total assets under management as at that date.

Vehicle financing business

In the FY 2013-14, we have ventured asset financing of vehicles. Our customers are predominantly small entrepreneurs and self-employed individuals in rural and semi-urban areas, such as transport operators, taxi operators and farmers. Our customers typically contribute 10.0% to 30.0% of the purchase price of the asset, with the balance amount financed by us. We secure our loans through the hypothecation of each asset financed.

Interest Rate Model

All of our loans (a) are offered at fixed or variable interest rates, and (b) have principal and interest payable in weekly, fortnightly or monthly instalments and sometimes the loans are repaid at one go. The interest rates we charge our borrowers are principally based on our operating and funding costs, particularly our personnel and administrative costs, which we believe are significantly higher than those of most commercial banks and traditional non-banking finance companies. We have in the past progressively reduced the interest rates we charge to our borrowers whenever our costs have reduced, either as a result of economies of scale or lowered funding costs. We may continue to reduce our interest rates in the future as we achieve such economies of scale in other markets or further economies of scale in existing regions.

Loan Evaluation, Credit Appraisal and Disbursement

Loan evaluation

Due to our customer profile, in addition to a credit evaluation of the borrower, we rely on guarantor arrangements, the availability of security, referrals from existing relationships and close client relationships in order to manage our asset quality. All customer origination and evaluation, loan disbursement, loan administration and monitoring as well as loan recovery processes are carried out by our executives at each branch, who are responsible for (i) loan origination, (ii) credit evaluation, (iii) pre-lending field investigations and (iv) post lending credit appraisal. The team of officials responsible for origination of a loan is also responsible for the timely servicing of loans, recoveries, and monitoring performance of each loan from origination to closure of the loan. We offer incentivized salary structures to such officials where their incentives are directly linked to recovery of instalments of the principal amount and interest on the loans. We do not utilize or engage direct selling or other marketing and distribution agents or appraisers to carry out these processes. We follow certain procedures for the evaluation of the creditworthiness of potential borrowers. Our credit appraisal process is as follows:

When a customer is identified and the requisite information for a financing proposal is received, a branch manager or our branch executive personally visits such customer at their homes and/or place of business to assess the loan requirements and creditworthiness of such customer. We also require an applicant to provide appropriate references from existing or former customers. The proposal form requires the customer to provide information on the age, address, employment details and annual income of the customer, as well as information on outstanding loans.

Credit Appraisal

We undertake various credit control checks, diligence and field investigations on a prospective customer which inter-alia includes an internal data de-duplication check, CIBIL database check, fraud verification, asset verification and valuation, trade credit reference checks and other legal and technical verification procedures which also includes detailed analysis of financial statements, bank statements and other documents put together constitute the credit file for all customers. From time to time, our management lays down loan approval parameters which are linked to the value of the underlying security and/or collateral. The borrower is charged prepayment charges in the event of termination of the loan by prepayment. Security received from the borrower, including unutilized post-dated cheques, if any, is released on repayment of all dues or on collection of the entire outstanding loan amount, provided no other existing right or lien for any other claim exists against the borrower. After having completed our internal verification procedures all documents submitted by the prospective customer are checked and verified as required and any discrepancies and/or gaps in such documentation are highlighted and sent to the prospective customer for corrections, explanations and resubmissions as required.

The files provided are at length reviewed by the credit managers for evaluation using credit evaluation tool. Based on the document review the credit managers conduct personal discussions with the customers at their workplace. The discussion is intended to gather information about the business model of the customer, his positioning in the value chain, dependence of suppliers and/or customers and to ascertain any business risks like export dependence, raw-material supplies, etc. which might adversely impact the business cash flows and hence diminish repayment capacity. Based on the all the information gathered, and assessment of customer's business risks, debt servicing ability and collateral risks, the credit manager puts the transaction proposal to appropriate approving committee in the hierarchy for decision.

Approval and Disbursement Process

Once the credit history, credentials, information and documents have been submitted by the prospective customer and verified to our satisfaction, the applications are approved at the appropriate credit approval level.

There are four progressive levels of approvals which a proposal can be put to which are based on loan product, loan amount and identified risks. All proposals require minimum of two approvals and up to four approvals for larger ticket size loans. For gold loan, the branch manager is authorized to approve a loan if the proposal meets the criteria established for the approval of a loan. For MSME loan, personal loan and microfinance, our corporate office is authorised to provide final approval in consultation with the branch. The applicant is intimated of the outcome of the approval process, as well as the amount of loan approved, the terms and conditions of such financing, including the rate of interest (annualized) and the application of such interest during the tenure of the loan. With due sanctioning of the loan, we execute agreements in connection with the loan and creation of security in relation thereto, if any, with the customer. Margin money and other charges, if any, are collected prior to loan disbursements. The disbursing officer retains evidence of the applicant's acceptance of the terms and conditions of the loan as part of the loan documentation.

Prior to the loan disbursement, our concerned officer ensures that a Know Your Customer, ("KYC"), checklist is completed by the applicant. The concerned officer verifies such information provided and includes the records in the relevant loan file. The officer is also required to ensure that the contents of the loan documents are explained in detail to the customer either in English or in the local language of the customer. The customer is provided with a copy of the loan documents executed by him. Further although our customers have the option of making payments by cash or cheque, we may require the applicant to submit post-dated cheques covering an initial period prior to any loan disbursement.

Loan administration and monitoring

The customer (and guarantor, if any) execute(s) the security creation documents and the loan agreement setting out the terms of the loan. A loan repayment schedule is attached as a schedule to the loan agreement, which generally sets out periodical repayment terms. Repayments are made in periodical instalments. Loans disbursed are recovered from the customer in accordance with the loan terms and conditions agreed with the customer. We track loan repayment schedules of our customers on a monthly basis, based on the outstanding tenure of the loans, the number of instalments due and defaults committed, if any. This data is analysed based on the loans disbursed and location of the customer. All recovery of amounts due on loans is managed internally by us. We ensure complete focus on all stages of the collections process. We monitor the completeness of documentation, creation of security etc. through regular visits to the business outlets by our regional as well as corporate office executives and internal auditors. All customer accounts are reviewed on a regular basis.

We monitor the completeness of documentation, creation of security etc. through regular visits to our branches by the regional as well as corporate office executives and internal auditors. All borrower accounts are reviewed at least once a year, with a higher frequency of reviews for the larger exposures and delinquent borrowers. The branch managers review collections regularly and personally contact borrowers that have defaulted on their loan payments. Branch managers are assisted by the officers responsible for loan origination, who are also responsible for the collection of instalments from each borrower serviced by them. We believe that close monitoring of debt servicing efficiency enables us to maintain high recovery ratios.

Collection and Recovery

We believe that our loan recovery procedure is particularly well-suited to our target market for each of our products. The entire collection operation is administered in-house through our branch officials and we do not outsource loan recovery and collection operations. In case of default, the reasons for the default are identified by the officer responsible for each loan and appropriate action is initiated, such as requiring partial repayment and/or seeking additional guarantees or collateral.

In the event of a default on three loan instalments, the relevant officer is required to make a personal visit to the borrower to determine the gravity of the loan recovery problem. We may initiate the process for repossession of the underlying asset and/or enforcement of the charge if required. Our officers are trained to repossess assets and/or enforce the security interest and no external agency is involved in such processes. Repossessed assets are held at designated secured facilities for eventual disposal. The notice to the customer specifies the outstanding amount to be paid within a specified period, failing which the asset may be disposed of and/or the charge

enforced. In the event there is a short fall in the recovery of the outstanding amount from enforcement of the charge, legal proceedings against the customer may be initiated.

Branch Network

As on June 30, 2019, we had 125 branches in the states of Kerala, Karnataka and Tamil Nadu. Risk Management

Risk management forms an integral part of our business as we are exposed to various risks relating to the Loan business. The objective of our risk management systems is to review the operations of the organization followed by identifying potential threats to the organization and the likelihood of their occurrence, and then taking appropriate actions to address the most likely threats and to provide a framework that enables future activities to take place in a consistent & controlled manner and to improve the decision making, planning and prioritization by comprehensive and structured understanding of business activities, volatility and opportunities/ threats.

Asset and Liability Management (“ALM”)

Our business operations require steady flow of working capital and hence managing the day to day liquidity becomes a critical function. The ALM, amongst other functions, is concerned with risk management, providing a comprehensive as well as a dynamic framework for measuring, monitoring and managing liquidity, market risk and interest rate risk. The ALM ensures proper balance of assets and liabilities of the company as per guidelines issued by Reserve Bank of India from time to time. The ALM also computes and monitors monitor periodically the maturity pattern of the various liabilities and assets of the company.

Credit Risk

Credit risk is the possibility of loss due to the failure of any counterparty abiding by the terms and conditions of any financial contract with us. We aim to reduce the aforesaid credit risk through a rigorous loan approval and collateral appraisal process, as well as a strong NPA monitoring and collection strategy.

Operational Risk

Operational risk is broadly defined as the risk of direct or indirect loss due to the failure of systems, people or processes, or due to certain other external events. We have instituted a series of checks and balances, including an operating manual, and both internal and external audit reviews. Although we disburse loans in a relatively

short period of time, we have clearly defined appraisal methods as well as KYC compliance procedures in place to mitigate operational risks. Any loss on account of failure by employees to comply with defined appraisal mechanism is recovered out of their variable incentive. We also have detailed guidelines on movement and security measures of cash or gold. We are in the process of completing the installation of a centralised software which automates inter branch transactions, enabling branches to be monitored centrally and thus reducing the risk of un-reconciled entries. In addition, we are in the process of installing surveillance cameras across our various branches, and subscribe to insurance to cover employee theft or fraud and burglary. Our internal audit department and our centralised monitoring systems assist in the management of operational risk.

Financial Risk

Our business is cash intensive and requires substantial funds, on an on-going basis to finance the loan portfolio and to grow it. Any disruption in the funding sources might have an adverse effect on our liquidity and financial condition. Our Company is proactively pursuing a system of identifying and accessing newer and cheaper sources of funds, to finance the loan book and to grow the business. Our Asset Liability Committee meets regularly and reviews the liquidity position of our Company and ensures availability of sufficient funding in advance.

Market Risk

Market risk refers to potential losses arising from the movement in market values of interest rates in our business. The objective of market risk management is to avoid excessive exposure of our earnings to loss. The majority of our borrowings, and all the loans we make, are at fixed rates of interest. Thus, presently, our interest rate risk is minimal.

Internal Audit Department

Our internal audit department assists in the management of operational risk using our centralised monitoring systems. Separate divisions of our internal audit department are in place to handle the audit of the departments of the corporate office and those of the branch offices. The audits of our branches are divided into two categories: (i) Audit and (ii) Inspection. Branch audit is carried out quarterly with the focus on the verification of documents, accounts, performance and compliance. In addition, an incremental high value loan check is carried out by regional managers as part of their periodical branch inspection.

Risk Management Audit

Our branch auditors also carry out a system driven risk audit on certain identified key risk parameters. These are keyed into the system and alerts are sent to branch controllers and top management in case the risk weight given under a specific parameter goes beyond the prefixed tolerance levels. In all such cases, the concerned branches are inspected by the branch controllers or top management personnel depending on the severity of risk and immediate remedial actions are initiated.

ALM Organisation

The Asset - Liability Committee (ALCO) is responsible for ensuring adherence to the limits set by the Board as well as for deciding the business strategy of our Company (on the assets and liabilities sides) in line with our Company's budget and decided risk management objectives.

The business and risk management strategy of our Company will ensure that our Company operates within the limits/parameters set by the Board. The business issues that an ALCO would consider, inter alia, includes product pricing, desired maturity profile and mix of the incremental assets and liabilities, prevailing interest rates offered by other peer NBFCs for the similar services/product, etc. In addition to monitoring the risk levels of our Company, the ALCO reviews the results of and progress in implementation of the decisions made in the previous meetings. The ALCO would also articulate the current interest rate view of our Company and base its decisions for future business strategy on this view.

The frequency of holding ALCO meetings is quarterly.

Liquidity Risk Management

Liquidity risk is the non-availability of cash to pay a liability that falls due. A company deemed to be financially sound if it is in a position to carry on its business smoothly and meet all the obligations – both long term as well as short term – without strain. Liquidity Risk arises largely due to maturity mismatch associated with assets and liabilities of the Company. Liquidity risk stems from the inability of the Company to fund increase in assets, manage unplanned changes in funding sources and meet financial commitments when required.

The major funding source for the Company is by way of equity share, capital, debentures and subordinated debts. Though these are external sources of funds the Company is exposed to following risks:

- Interest Rate risk arises because of increase in cost of funds due to an overall increase in the interest rates economy.
- Asset-Liability Mismatch can lead to severe liquidity shortfall and result in significantly higher costs of funds.
- A high degree of leverage risk can severely impact the liquidity profile of the Company and lead to default in meeting its liabilities.

Company has implemented liquidity management policy for reducing the risk relating to liquidity issues. Currently the policies relating to liquidity are as follows:

- The Company is maintaining high capital adequacy ratio over and above limits prescribed by regulators.
- The Company ensures to keep liquidity to cover unexpected repayment obligation.
- Promoting fund infusion by way of Non-Convertible debentures and subordinated debts so that due date for interest and maturity can be pre known.
- Funding from long terms sources and lending as short term loans.
- Reducing the percentage of unsecured lending so that repayment upto a level is not affected.

Interest Rate Risk (IRR)

Interest rate risk is the risk where changes in the market interest rates might adversely affect an NBFC's financial condition. The changes in the interest rates affect the NBFCs in a larger way. The immediate impact of changes in the interest rates is on NBFCs earnings by changing its Net Interest Income. The interest rate risks are viewed from earning perspective and economic value perspective, respectively. It is the intention of the RBI to move over to the modern techniques of Interest Rate Risk Measurement like Duration Gap Analysis, Simulation and Value at Risk over time when NBFCs acquire sufficient expertise and sophistication in acquiring and handling MIS.

Over the last several years, the Government of India has substantially deregulated the financial sector. As a result, interest rates are now primarily determined by the market, which has increased the interest rate risk exposure.

Our results of operations are substantially dependent upon the level of our net interest margins. Interest rates are sensitive to many factors beyond our control, including the RBI's monetary policies, domestic and international economic and political conditions and other factors. Rise in inflation, and consequent changes in the bank rates, repo rates and reserve repo rates by the RBI has led to an increase in interest rates on loans provided by banks and financial institutions.

Following is the Interest Policy implemented by our Company in order to reduce the risk.

- Interest rate will be quoted only on annualized basis
- The Rate of Interest will be determined after considering cost of debt, operation cost, risk factor, tenure, market liquidity, competition etc.
- Risk Interest rate shall be determined by taking into account the degree of risk involved in in loans under each loan.
- Based on the following factors like value of collateral securities offered by the customers, tenure of the loan, financial position of the customer, credit reports of the customer, stability in earning etc our Company may charge discrete interest rate for different customers.
- The Company may levy penal interest for any delay or default in making payments of any dues besides normal interest and will be mentioned in bold in the loan agreement.
- Any changes in the interest will be applicable only on prospective basis.

- Decision for waiver of any of the charges or interest would normally not be entertained by the Company and it is the sole and absolute discretion of the company to deal with such request.

glass and steel counters, and the back office, strong room/safe and computer areas are locked and closed to customers. We also keep the pledged gold in joint custody stored securely in strong rooms. Competition

We face competition from banks, NBFCs and other unregulated/unorganised money lenders. Our Board believes that we can achieve economies of scale and increased operating efficiencies by increasing the number of branches under operation and proven operating methods. We believe that the primary elements of competition are the quality of customer service and relationship management, branch location and the ability to lend competitive amounts at competitive rates. In addition, we believe the ability to compete effectively will be based increasingly on strong management, regional market focus, automated management information systems and access to capital.

Insurance

2.2. Uses of Estimates

The preparation of financial statements requires the management to make estimates and assumptions considered in the reported amount of assets and liabilities (including contingent liabilities) as on the date of financial statements and the reported income and expenses during the reporting period.

Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

2.3. Property, Plant and Equipment

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses, if any. The cost of an item of property, plant and equipment comprises the cost of materials and direct labour, any other costs directly attributable to bringing the item to working condition for its intended use, and estimated costs of dismantling and removing the item and restoring the site on which it is located.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

Losses arising from the retirement of, and gains or losses arising from disposal of tangible assets which are carried at cost are recognised in the Statement of Profit and Loss.

2.4. Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortized on a straight line basis over the estimated useful economic life.

2.5. Depreciation and Amortisation

Depreciation on tangible fixed assets is provided using the Written down value Method based on the useful life of the asset and is charged to the Statement of Profit and Loss in the manner prescribed in Schedule II to the Companies Act, 2013.

Intangible Assets are amortised on a Straight Line basis over the estimated useful economic life. Computer Software which is not an integral part of the related hardware is classified as an intangible asset, and amortised over a period of five years, being its estimated useful life.

2.6. Impairment

At Balance Sheet date, an assessment is done to determine whether there is any indication of impairment in the carrying amount of the Company's assets. If any such indication exists, the asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount.

An assessment is also done at each Balance Sheet date whether there is any indication that an impairment loss recognised for an asset in prior accounting periods may no longer exist or may have decreased. If any such indication exists, the asset's recoverable amount is estimated. The carrying amount of the fixed asset is increased to the revised estimate of its recoverable amount but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of impairment loss is recognised in the Statement of Profit and Loss for the year.

After recognition of impairment loss or reversal of impairment loss as applicable, the depreciation charge for the fixed asset is adjusted in future periods to allocate the asset's revised carrying amount, less its residual value (if any), on written down value basis over its remaining useful life.

2.7. Revenue recognition

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. Current investments are stated at the lower of cost and fair value. The comparison of cost and fair value is done separately in respect of each category of investments. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments. Investment in subsidiary company is stated at cost.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

Current tax is measured at the amount expected to be paid to (recovered from) the taxation authorities using the applicable tax rates and tax laws.

Deferred tax is recognised for all the timing differences, subject to the consideration of prudence in respect of deferred tax assets. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carry forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of such assets. The carrying amount of deferred tax assets is reviewed at each Balance Sheet date for any write down, as considered appropriate.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. BASIS OF ALLOTMENT

Basis of Allotment for NCDs

The Registrar will aggregate the Applications, based on the applications received through an electronic book from the Stock Exchange and determine the valid Application for the purpose of drawing the basis of allocation.

Allocation Ratio

The registrar will aggregate the applications based on the applications received through an electronic book from the stock exchanges and determine the valid applications for the purpose of drawing the basis of allocation. Grouping of the application received will be then done in the following manner:

Grouping of Applications and Allocation Ratio: Applications received from various applicants shall be grouped together on the following basis:

- (a) Applications received from Category I applicants: Applications received from Category I, shall be grouped together, (“**Institutional Portion**”);
- (b) Applications received from Category II applicants: Applications received from Category II, shall be grouped together, (“**Non-Institutional Portion**”);
- (c) Applications received from Category III applicants: Applications received from Category III, shall be grouped together, (“**Retail Individual Portion**”)

For removal of doubt, “**Institutional Portion**”, “**Non-Institutional Portion**” and “**Retail Individual Portion**” are individually referred to as “**Portion**” and collectively referred to as “**Portions**”

For the purposes of determining the number of NCDs available for allocation to each of the abovementioned Portions, our Company shall have the discretion of determining the number of NCDs to be allotted over and above the Base Issue Size, in case our Company opts to retain any oversubscription in the Issue up to ₹ 2,500 lakhs. The aggregate value of NCDs decided to be allotted over and above the Base Issue Size, (in case our Company opts to retain any oversubscription in the Issue), and/or the aggregate value of NCDs up to the Base

Issue Size shall be collectively termed as the “**Overall Issue Size**”.

Basis of Allotment for NCDs

Allotments in the first instance:

- (i) Applicants belonging to the Category I, in the first instance, will be allocated NCDs up to 10% of Overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each application duly acknowledged by the Lead Manager and their respective Affiliates/SCSB (Designated Branch or online acknowledgement));
- (ii) Applicants belonging to the Category II, in the first instance, will be allocated NCDs up to 40% of Overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each application duly acknowledged by the Members of the Syndicate/Trading Members/SCSB (Designated Branch or online acknowledgement));
- (iii) Applicants belonging to the Category III, in the first instance, will be allocated NCDs up to 50% of Overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each application duly acknowledged by the Members of the Syndicate/Trading Members/SCSB (Designated Branch or online acknowledgement));

Allotments, in consultation with the Designated Stock Exchange, shall be made on date priority basis i.e. a first-come first-serve basis, based on the date of upload of each Application in to the Electronic Book with Stock Exchange, in each Portion subject to the Allocation Ratio. However, on the date of oversubscription, the allotments would be made to the applicants on proportionate basis.

(a) Under Subscription:

Under subscription, if any, in any Portion, priority in allotments will be given in the following order:

- (i) Individual Portion
- (ii) Non-Institutional Portion and Resident Indian individuals and Hindu undivided families through the Karta applying who apply for NCDs aggregating to a value exceeding ₹ 5 lakhs;
- (iii) Institutional Portion
- (iv) on a first come first serve basis.

Within each Portion, priority in Allotments will be given on a first-come-first-serve basis, based on the date of upload of each Application into the electronic system of the Stock Exchange.

For each Portion, all Applications uploaded in to the Electronic Book with the Stock Exchange would be treated at par with each other. Allotment would be on proportionate basis, where Applications uploaded into the Platform of the Stock Exchange on a particular date exceeds NCDs to be allotted for each Portion respectively.

Minimum allotment of 1 (one) NCD and in multiples of 1 (one) NCD thereafter would be made in case of each valid Application.

(b) Allotments in case of oversubscription:

In case of an oversubscription, allotments to the maximum extent, as possible, will be made on a first-come first-serve basis and thereafter on proportionate basis, i.e. full allotment of NCDs to the valid applicants on a first come first serve basis for forms uploaded up to 5 pm of the date falling 1 (one) day prior to the date of oversubscription and proportionate allotment of NCDs to the valid applicants on the date of oversubscription (based on the date of upload of the Application on the Stock Exchange Platform, in each Portion). In case of over subscription on date of opening of the Issue, the Allotment shall be made on a proportionate basis. Applications received for the NCDs after the date of oversubscription will not be considered for allotment.

In view of the same, the Investors are advised to refer to the Stock Exchange website at www.bseindia.com for details in respect of subscription.

- (a) Proportionate Allotments: For each Portion, on the date of oversubscription:
- (i) Allotments to the applicants shall be made in proportion to their respective application size, rounded off to the nearest integer;
 - (ii) If the process of rounding off to the nearest integer results in the actual allocation of NCDs being higher than the Issue size, not all applicants will be allotted the number of NCDs arrived at after such rounding off. Rather, each applicant whose allotment size, prior to rounding off, had the highest decimal point would be given preference;
 - (iii) In the event, there are more than one applicant whose entitlement remain equal after the manner of distribution referred to above, our Company will ensure that the basis of allotment is finalised by draw of lots in a fair and equitable manner;
 - (iv) The total Allotment under Option I to Option X of the NCDs shall not exceed a value more than ₹ 12,500 lakhs.
- (b) Applicant applying for more than one Options of NCDs:

In cases of odd proportion for allotment made, our Company in consultation with the Lead Manager will allot the residual NCD (s) in the following order:

The following description is a summary of certain sector specific laws and regulations in India, which are applicable to our Company. The information detailed in this chapter has been obtained from publications available in the public domain. The regulations set out below may not be exhaustive, and are only intended to provide general information to the investors and are neither designed nor intended to substitute for professional legal advice. The statements below are based on the current provisions of the Indian law, and the judicial and administrative interpretations thereof, which are subject to change or modification by subsequent legislative, regulatory, administrative or judicial decisions.

The major regulations governing our Company are detailed below:

We are a non-deposit taking (which does not accept public deposits), non-systemically important, NBFC. As such, our business activities are regulated by RBI Regulations applicable to non-public deposit accepting NBFCs (“NBFC-ND”).

As of September 18, 2018, the RBI has issued an updated Master Direction - Non-Banking Financial Company - Non-Systemically Important Non-Deposit taking Company (Reserve Bank) Directions, 2016, dated September 01, 2016 as amended, (“Master Directions”) applicable to all NBFC-ND-NSI’s.

Regulations governing NBFCs

Reserve Bank of India Act, 1934

As per the RBI Act, a financial institution has been defined as a company which includes a non-banking institution carrying on as its business or part of its business the financing activities, whether by way of making loans or advances or otherwise, of any activity, other than its own and it is engaged in the activities of loans and advances, acquisition of shares/ stock/ bonds/ debentures/ securities issued by the Government of India or other local authorities or other marketable securities of like nature, leasing, hire-purchase, insurance business, chit business but does not include any institution whose principal business is that of carrying out any agricultural or industrial activities or the sale/ purchase/ construction of immovable property.

As per prescribed law any company that carries on the business of a non-banking financial institution as its ‘principal business’ is to be treated as an NBFC. The term ‘principal businesses has not been defined in any statute, however, RBI has clarified through a press release (Ref. No. 1998-99/1269) issued in 1999, that in order to identify a particular company as an NBFC, it will consider both the assets and the income pattern as evidenced from the last audited balance sheet of the company to decide a company’s principal business. The company will be treated as an NBFC if its financial assets are more than 50 percent of its total assets (netted off by intangible assets) and income from financial assets should be more than 50 percent of the gross income. Both these tests are required to be satisfied in order to determine the principal business of a company.

Every NBFC is required to submit to the RBI a certificate, from its statutory auditor within one month from the date of finalisation of the balance sheet and in any case, not later than December 30 of that year, stating that it is engaged in the business of non-banking financial institution requiring it to hold a certificate of registration.

NBFCs are primarily governed by the RBI Act and the Master Directions. In addition to these regulations, NBFCs are also governed by various circulars, notifications, guidelines and directions issued by the RBI from time to time.

Although by definition, NBFCs are permitted to operate in similar sphere of activities as banks, there are a few important and key differences. The most important distinctions are:

- An NBFC cannot accept deposits repayable on demand – in other words, NBFCs can only accept fixed term deposits. Thus, NBFCs are not permitted to issue negotiable instruments, such as cheques which are payable on demand; and
- NBFCs are not allowed to deal in foreign exchange, even if they specifically apply to the RBI for approval in this regard.

Types of NBFCs

Section 45-IA of the RBI Act makes it mandatory for every NBFC to get itself registered with the Reserve Bank in order to be able to commence any of the aforementioned activities.

Further, an NBFC may be registered as a deposit accepting NBFC (“**NBFC-D**”) or as a non-deposit accepting NBFC (“**NBFC-ND**”).

NBFCs registered with RBI are further classified as:

- i. Asset financing companies;
- ii. Investment companies;
- iii. Loan companies;
- iv. Infrastructure finance companies;
- v. Systemically important core investment companies;
- vi. Infrastructure debt fund – NBFCs;
- vii. NBFC- Factors;
- viii. Mortgage guarantee company;
- ix. NBFC- Non operative financial holding company; and/or
- x. NBFC – micro finance institutions.

Regulatory Requirements of an NBFC under the RBI Act

Net Owned Fund

Section 45-IA of the RBI Act provides that to carry on the business of a NBFC, an entity would have to register as an NBFC with the RBI and would be required to have a minimum net owned fund of ₹20 million (Rupees Twenty million only). For this purpose, the RBI Act has defined “net owned funds” to mean:

- a. the aggregate of the paid-up equity capital, preference shares which are compulsorily convertible into equity and free reserves as disclosed in the latest balance sheet of the company, after deducting (i) accumulated balance of loss, (ii) deferred revenue expenditure, (iii) deferred tax assets (net); and (iv) other intangible assets; and
- b. Further reduced by amounts representing,
 1. investment by such companies in shares of (i) its subsidiaries, (ii) companies in the same group, (iii) other NBFCs; and
 2. the book value of debentures, bonds, outstanding loans and advances (including hire purchase and lease finance) made to, and deposits with (i) subsidiaries of such companies; and (ii) companies in the same group, to the extent such amount exceeds 10% of (a) above.

Reserve Fund

In addition to the above, Section 45-IC of the RBI Act requires NBFCs to create a reserve fund and transfer therein a sum of not less 20% of its net profits earned annually before declaration of dividend. Such sum cannot be appropriated by the NBFC except for the purpose as may be specified by the RBI within 21 days from the date of such withdrawal.

Maintenance of liquid assets

The RBI has prescribed that every NBFC shall invest, and continue to invest, in unencumbered approved securities valued at a price not exceeding the current market price of such securities an amount which shall, at

the close of business on any day, be not less than 10% in approved securities and the remaining in unencumbered term deposits in any scheduled commercial bank; the aggregate of which shall not be less than 15% of the public deposit outstanding at the close of business on the last working day of the second preceding quarter.

Our Company has been classified as an NBFC-ND-NSI.

Non-systemically important NBFC-NDs

The RBI in its Master Directions revised the threshold for defining systemic significance for NBFCs-ND in the light of the overall increase in the growth of the NBFC sector. NBFCs-ND-NSI will henceforth be those NBFCs-ND which have asset size of below ₹500 as per the last audited balance sheet.

As on March 31, 2019, our Company has asset size of ~ ₹ 425 crores and post completion of the Issue, the Company will have asset size of more than 500 crores. Subsequently, our Company will be considered as a systemically important ND-NBFC under Master Direction - Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016.

Master Direction - Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016

All ND-NBFCs with an asset size of ₹100 crore or more as per the last audited balance sheet will be considered as a systemically important ND-NBFC (“NBFC – ND – SI”). RBI by a notification dated June 04, 2009 had clarified that once an NBFC reaches an asset size of ₹ 100 crore, or above, it shall come under the regulatory requirement for systemically important ND-NBFC, despite not having such assets on the date of the last balance sheet. The RBI in its notification (RBI/2014-15/299 DNBR (PD) CC.No.002/03.10.001/2014-15) dated November 10, 2014 revised the threshold for defining systemic significance for NBFCs-ND in the light of the overall increase in the growth of the NBFC sector. NBFCs-ND -SI will henceforth be those NBFCs-ND which have asset size of ₹ 500 crore and above as per the last audited balance sheet. Moreover as per this amendment, all NBFCs- ND with assets of ₹ 500 crore and above, irrespective of whether they have accessed public funds or not, shall comply with prudential regulations as applicable to NBFCs-ND -SI. NBFCs- ND -SI is required to comply with conduct of business regulations if customer interface exists.

All systemically important NBFCs are required to maintain a minimum Capital to Risk-Weighted Assets Ratio (“CRAR”) of 15%.

Loan-to-value guidelines

The RBI vide the Master Directions, directed all NBFCs to: (i) maintain a loan-to-value ratio not exceeding 75% for loans granted against the collateral of gold jewellery and; (ii) disclose in their balance sheet the percentage of such loans to their total assets.

Further, NBFC’s are also required to not grant any advance against bullion / primary gold, gold bullion, gold jewellery, gold coins, units of Exchange Traded Funds (ETF) and units of gold mutual fund. Norms for excessive interest rates

All NBFCs are required to put in place appropriate internal principles and procedures in determining interest rates and charges for loans and advances. The Master Directions stipulate that the Board of each NBFC shall adopt an interest rate model after taking into account the various relevant factors, such as, among others, cost of funds, margin and risk premium. The rate of interest and the approach for gradation of risk and the rationale for charging different rates of interest for different categories of borrowers shall be required to be disclosed in the

application form and communicated explicitly in the sanction letter. Furthermore, the same is also required to be made available on the company's website or be published in the relevant newspapers and is required to be updated in the event of any change therein. Prudential Norms

The Master Directions amongst other requirements prescribe guidelines on NBFC-ND regarding income recognition, asset classification, provisioning requirements, constitution of audit committee, capital adequacy requirements, concentration of credit/ investment and norms relating to infrastructure loans. Further the concentration of credit/ investment norms shall not apply to a non-systemically important non-banking financial company not accessing public funds in India, either directly or indirectly, and not issuing guarantees.

Provisioning Requirements

An NBFC-ND, after taking into account the time lag between an account becoming non-performing, its recognition, the realisation of the security and erosion overtime in the value of the security charged, shall make provisions against sub-Standard Assets, Doubtful Assets and Loss Assets in the manner provided for in the Master Directions.

In the interests of counter cyclicity and so as to ensure that NBFCs create a financial buffer to protect them from the effect of economic downturns, RBI vide their circular no. DNBS.PD.CC. No.207/ 03.02.002 /2010-11 dated January 17, 2011, introduced provisioning for Standard Assets by all NBFCs. The provisions on standard assets are not reckoned for arriving at net NPAs. The provisions towards Standard Assets are not needed to be netted from gross advances but shown separately as 'Contingent Provisions against Standard Assets' in the balance sheet. NBFCs are allowed to include the 'General Provisions on Standard Assets' in Tier II capital which together with other 'general provisions/ loss reserves' will be admitted as Tier II capital only up to a maximum of 1.25% of the total risk-weighted assets.

Further the RBI vide circular dated March 27, 2015 require the NBFCs primarily engaged in the business of lending against gold jewellery (such loans comprising 50% or more of their financial assets) to maintain a minimum Tier I capital of 12%.

Owned Funds, are defined as paid-up equity capital, preference shares which are compulsorily convertible into equity, free reserves, balance in share premium account; capital reserve representing surplus arising out of sale proceeds of asset, excluding reserves created by revaluation of assets; less accumulated loss balance, book value of intangible assets and deferred revenue expenditure, if any.

The book value of such instrument is subjected to discounting as prescribed.

Exposure Norms

In order to ensure better risk management and avoidance of concentration of credit risks, the RBI has, in terms of the Master Directions, prescribed credit exposure limits for financial institutions in respect of their lending to single/ group borrowers. Credit exposure to a single borrower shall not exceed 15% of the owned funds of the non-systemically important NBFC-ND, while the credit exposure to a single group of borrowers shall not exceed 25% of the owned funds of the non-systemically important NBFC-ND. Further, the non-systemically important NBFC-ND may not invest in the shares of another company exceeding 15% of its owned funds, and in the shares of a single group of companies exceeding 25% of its owned funds. However, this prescribed ceiling shall not be applicable on a NBFC-ND-NSI for investments in the equity capital of an insurance company to the extent specifically permitted by the RBI. Any NBFC-ND-NSI not accessing public funds, either directly or indirectly may make an application to the RBI for modifications in the prescribed ceilings Any non-systemically important NBFC-ND classified as asset finance company by RBI, may in exceptional circumstances, exceed the above ceilings by 5% of its owned fund, with the approval of its Board of Directors. - Loss assets.

Further, such class of assets would not be entitled to be upgraded merely as a result of rescheduling, unless it satisfies the conditions required for such upgradation. Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 (“SARFAESI”)

The SARFAESI Act regulates the securitization and reconstruction of financial assets of banks and financial institutions. The SARFAESI Act provides for measures in relation to enforcement of security interests and rights of the secured creditor in case of default.

The RBI has issued guidelines to banks and financial institutions on the process to be followed for sales of financial assets to asset reconstruction companies. These guidelines provide that a bank or a financial institution or an NBFC may sell financial assets to an asset reconstruction company provided the asset is an NPA. A bank or financial institution or NBFC may sell a financial asset only if the borrower has a consortium or multiple banking arrangements and at least 75% by value of the total loans to the borrower are classified as an NPA and at least 75% by the value of the banks and financial institutions in the consortium or multiple banking arrangement agree to the sale. In addition to the above, a financial asset may be sold by any bank or financial institution where the asset is reported, by the bank financial institution to Central Repository for Information on Large Credit, as an NPA wherein the principal or interest payment is overdue between 61-90 days.

As per the SARFAESI Amendment Act of 2004, the constitutional validity of which was upheld in a recent Supreme Court ruling, non-performing assets have been defined as an asset or account of a borrower, which has been classified by a bank or financial institution as sub-standard, doubtful or loss asset in accordance with directions or guidelines issued by the RBI. In case the bank or financial institution is regulated by a statutory body/authority, NPAs must be classified by such bank in accordance with guidelines issues by such regulatory authority. The RBI has issued guidelines on classification of assets as NPAs. Further, these assets are to be sold on a “without recourse” basis only.

The SARFAESI Act provides for the acquisition of financial assets by Securitization Company or Reconstruction Company from any bank or financial institution on such terms and conditions as may be agreed upon between them. A securitization company or reconstruction company having regard to the guidelines framed by the RBI may, for the purposes of asset reconstruction, provide for measures such as the proper management of the business of the borrower by change in or takeover of the management of the business of the borrower, the sale or lease of a part or whole of the business of the borrower and certain other measures such as rescheduling of payment of debts payable by the borrower; enforcement of security.

Additionally, under the provisions of the SARFAESI Act, any securitisation company or reconstruction

company may act as an agent for any bank or financial institution for the purpose of recovering its dues from the borrower on payment of such fee or charges as may be mutually agreed between the parties.

Various provisions of the SARFAESI Act have been amended by the Enforcement of Security Interest and Recovery of Debt Laws and Miscellaneous Provisions (Amendment) Act, 2016 as also the Insolvency and Bankruptcy Code, 2016 (which amended S.13 of SARFAESI). As per this amendment, the Adjudicating Authority under the Insolvency and Bankruptcy Code, 2016 shall by order declare moratorium for prohibiting inter alia any action to foreclose, recover or enforce any security interest created by the corporate debtor in respect of its property including any action under the SARFAESI Act

Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2017 (“FEMA 20”)

Foreign investment in India is governed primarily by the provisions of the FEMA which relates to regulation primarily by the RBI and the rules, regulations and notifications thereunder, and the policy prescribed by the Department of Industrial Policy and Promotion (“DIPP”), GoI which is regulated by the relevant ministries of the GoI. The RBI, in exercise of its power under the FEMA, has notified FEMA 20 to prohibit, restrict or regulate, transfer by or issue of security to a person resident outside India. FEMA 20 lays down that no prior consent and approval is required from the RBI for FDI under the “automatic route” within the specified sectoral caps. In respect of all industries not specified as FDI under the automatic route, and in respect of investment in excess of the specified sectoral limits under the automatic route, approval may be required from the relevant ministry/ministries of the Government and/or the RBI.

Foreign Direct Investment (“FDI”)

FDI in an Indian company is governed by the provisions of the FEMA read with FEMA 20 and the FDI Policy. FDI is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the approval route, depending upon the sector in which FDI is sought to be made. Under the automatic route, no prior Government approval is required for the issue of securities by Indian companies/acquisition of securities of Indian companies, subject to the sectoral caps and other prescribed conditions. Investors are required to file the required documentation with the RBI within 30 days of such issue/acquisition of securities. Under the approval route, prior approval from the relevant ministry/ministries of the Government or RBI is required. FDI for the items/activities that cannot be brought in under the automatic route (other than in prohibited sectors) may be brought in through the approval route. Further, as per the sector specific guidelines of the Government, 100% FDI/NRI investments are allowed under the automatic route in certain NBFC activities subject to compliance with guidelines of the RBI in this regard.

Foreign investment in Indian securities is regulated through the Consolidated FDI Policy and FEMA. The government bodies responsible for granting foreign investment approvals are the concerned ministries/departments of the Government of India and the RBI. The Union Cabinet has recently approved phasing out the FIPB, as provided in the press release dated May 24, 2017. Accordingly, pursuant to the office memorandum dated June 5, 2017, issued by the Department of Economic Affairs, Ministry of Finance, approval of foreign investment under the FDI policy has been entrusted to concerned ministries/departments. Subsequently, the DIPP issued the Standard Operating Procedure (SOP) for Processing FDI Proposals on June 29, 2017 (the “SOP”). The SOP provides a list of the competent authorities for granting approval for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned administrative ministry/department shall act as the competent authority (the “Competent Authority”) for the grant of post facto approval of foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP shall identify the Competent Authority. The DIPP has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendment to FEMA. In case of any conflict FEMA prevails. The Consolidated FDI Policy consolidates the policy framework in place as on August 27, 2017. Further, on January 4, 2018 the RBI released the Master Directions on Foreign Investment in India.

Under the approval route, prior approval from RBI is required. FDI for the items/activities that cannot be brought in under the automatic route may be brought in through the approval route. Approvals are accorded on the recommendation of the relevant ministry of GoI.

As per the sector specific guidelines of the Government of India, the following are the relevant norms applicable for FDI in NBFCs:

- a. FDI investments up to 100% of the paid-up share capital of the NBFC is allowed under the automatic route in the following NBFC activities:
 - i. Merchant banking;
 - ii. Underwriting;
 - iii. Portfolio Management Services;
 - iv. Investment Advisory Services;
 - v. Financial Consultancy;
 - vi. Stock Broking;
 - vii. Asset Management;
 - viii. Venture Capital;
 - ix. Custodial Services;
 - x. Factoring;
 - xi. Credit rating Agencies;
 - xii. Leasing and Finance;
 - xiii. Housing Finance;
 - xiv. Forex Broking;
 - xv. Credit card business;
 - xvi. Money changing Business;
 - xvii. Micro Credit; and
 - xviii. Rural Credit.

- b. Where FDI is allowed on an automatic basis without FIPB approval, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where FIPB approval is obtained, no approval of the RBI is required except with respect to fixing the issue price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The foregoing description applies only to an issuance of shares by, and not to a transfer of shares of, Indian companies. Every Indian company issuing shares or convertible debentures in accordance with the RBI Regulations is required to submit a report to the RBI within 30 days of receipt of the consideration and another report within 30 days from the date of issue of the shares to the non-resident purchaser.

Detailed Rationale & Key Rating Drivers

The ratings continues to be constrained by moderate scale of operations with regional concentration of the loan portfolio, evolving MIS systems and processes, concentrated funding profile, moderate asset quality, relatively higher exposure to riskier borrower segments and exposure to market risk of the gold jewellery kept as security.

The rating however favourably factors in the experience of the promoter and management team, good profitably despite high operational costs and adequate capitalisation levels. The rating takes the note of capital raise of Rs.14 crore during March 2019.

Going forward, the ability of the company to grow its portfolio while improving asset quality, improve profitability by the way of reducing its operating expenses while expanding geographically and improve MIS systems will be the key rating sensitivities. Any change in the regulatory environment is also a key rating sensitivity.

Detailed description of the key rating drivers

Key Rating Strengths

Experienced Management team

KLM is led by professionals having significant experience in finance industry. Josekutty Xavier, who is the whole time director, has 35 years of experience in chit fund business, hire purchase loans among others. Shibu Theckumpuram who is the Executive director of KLM holds a bachelor's degree in economics has 30 years of experience in financial services.

KLMs board consists of people with vast expertise in various fields and is led by Chairman Mr.Alexander John Joseph who is the former chief secretary of Karnataka Government and former minister of tourism in

B

Government of Karnataka. The day to day operations of the company are handled by the Executive Director and Whole-time director and ably assisted by the experienced management team.

Adequate Capitalisation Levels

During FY18, KLM had raised equity of Rs.3.81 crore from the existing shareholders through private placement. Tier 1 CAR as on March 31, 2018 stood at 23.04% as against 44.79% as on March 31, 2017. The decrease in CAR levels is mainly on account of portfolio growth of 113% from Rs.91 crore as on March 31, 2017 to Rs.194 crore as on March 31, 2018. The company also raised equity of Rs.14 crore during March 2019 through private placement where the majority portion was invested by the existing shareholders. This round of equity along with profits generated during FY19 is expected to be sufficient to fund the growth projected for FY20. Tier 1 CAR as on March 31, 2019 stood at 16.74%.

Healthy profitability profile however high operating costs

During FY18, KLM reported a NIM of 18.02%. Operating expenses to average total assets remained high at 13.14% in FY18 due to branch expansion, advertising expenses and daily collection mechanism at the customer premises in few of the products. However, ROTA improved from 2.84% during FY17 to 3.37% during FY18.

During FY19, the company reported a PAT of Rs.5.97 crore on a total income of Rs.68.36 crore

Liquidity Profile

Gold loans and microfinance loans have a tenor of less than 1 year and other loans have tenor of around 2 years. With the portfolio being funded majorly through longer tenure borrowings, the liquidity position is adequate. Cash & cash equivalent as on March 31, 2019 stood at Rs.20.8 crore. KLM also has unavalled lines of credit of Rs.5.50 crore as on June 30, 2019.

Key Rating Weaknesses

Evolving MIS systems and processes

KLM offers gold loans across all the branches whereas business loans and personal loans are offered only in Kerala. With respect to gold loans, the branch employees have been trained to appraise quality of the gold jewelry provided as security against loan. The branches are provided with secured vaults with dual control keys, CCTV cameras and insurance. The company has an internal audit team consisting of 25 members and the team is head by an experienced personnel. The internal audit is a concurrent activity and ensured that every branch is audited once in a month.

KLM is migrating to a new MIS system which is used by many NBFCs and the integration of the same is in process. The new MIS system will enable the company to track the portfolio on a real time basis.

Relatively higher exposure to riskier borrower segments and inherent risk associated with gold loans

B

KLM is primarily lending towards the business and personal finance needs of the relatively riskier asset class comprising of low income borrowers in the informal sector. Since this segment is highly susceptible to the impact of economic downturn, asset quality is a key monitorable. The management team's good knowledge on this target customer segment provides comfort.

Concentrated Funding Profile

The resource profile is concentrated towards retails debentures which constitutes around 96% of the total outstanding borrowing as on March 31, 2018 and rest is towards bank borrowings. During November 2018, the company has raised its first public issue of NCDs for Rs.100 crore. The borrowings are expected to remain concentrated towards debentures in the medium term.

Improvement in scale of operations; however portfolio size remained moderate and geographically concentrated

KLM portfolio remained moderate with presence in 3 states and 110 branches of which majority of the branches are in Kerala. Though Gold loan is offered in all the branches, other loan products such as business loans, personal loans and microfinance loans are offered majorly only in Kerala. So portfolio remains concentrated towards Kerala. During FY18, portfolio grew by 112% from Rs.91 crore as on March 31, 2017 to Rs.192 crore as on March 31, 2018 and to Rs.247 crore as on November 30, 2018. As on March 31, 2019, the portfolio stood at Rs.374 crore.

Moderate asset quality

Asset quality continues to be moderate with the company reporting GNPA of 4.40% as on March 31, 2018 as against 4.23% as on March 31 2017 respectively. With the company planning to expand its loan portfolio with new branches & new regions, the ability to manage its asset quality remains critical. GNPA stood at 4.98% as on March 31, 2019.
